Choose a Voice

Voice selection is the first creative step in Studio. It determines the model, style, and available features for your audio. *You can change it later.*

To choose a voice:

1. Open the **Voice Library** by clicking the Avatar icon above the editor or selecting **See All Avatars** from the right sidebar.
2. Browse Voice options and listen to samples.
3. Use the **Style dropdown** to explore variations.
4. Select a Voice to apply it to your active section.

Tip: Save frequently used Voices by selecting **Add to Favorites** from the three-dot menu.

HELP ARTICLE

CURRENT

Article instructs: 'selecting See All Avatars from the right sidebar'

SUGGESTED FIX

Update to 'see all voices'.

WHAT CHANGED

Live Studio UI confirmed 'see all voices' link in sidebar.

Voice Cues limitation not documented

Getting Started with WellSaid Studio · help.wellsaid.io/.../39187892094099-Getting-Started-with-WellSaid-Studio

HELP ARTICLE

CURRENT

Article describes Voice Cues as a general feature without noting voice/model limitations.

SUGGESTED FIX

Add a note that Voice Cues availability depends on the selected voice and model. Some combinations show 'This voice does not support cues.'

WHAT CHANGED

Live Studio shows 'This voice does not support cues.' for some voice/model combinations.

A Hub, for All Your Voices

Caruso: The Next Generation of AI Voice Quality

List of WellSaid Voices

Available Languages, Accents, and Styles

Language Variety

We support several global languages, including Arabic, Chinese (Cantonese and Mandarin), Danish, Dutch, English, French, German, Italian, Japanese, Korean, Persian, Polish, Portuguese, Spanish, Swedish, and Turkish.

Accents

Our library of Voices offers variety.

English accents included: Australian, British, Canadian, Hindi, Irish, New Zealand, North American (Virginia/North Carolina, Midwestern, Mountain), Scottish, South African, English, US Mexican, and neutral American accents.

View a breakdown of [our entire Voice Library here](#).

Styles

Tailor the Voices to suit your content with various styles, including Narration.

HELP ARTICLE

CURRENT

The article lists 'New Zealand' as an available English accent in the voice library.

SUGGESTED FIX

Remove 'New Zealand' from the accent list, or add voices explicitly tagged as English (New Zealand) to the voice library. The List of WellSaid Voices page has no 'English (New Zealand)' section.

WHAT CHANGED

Cross-referenced the 'List of WellSaid Voices' page. It enumerates every voice by accent/region. There is no 'English (New Zealand)' section. The 'Available Languages' page claims NZ is available, but the actual voice roster doesn't include any NZ-labeled voices.

New

Article's English accent list is incomplete and uses outdated regional labels

Available Languages, Accents, and Styles · help.wellsaid.io/.../39079854241299-Available-Languages-Accents-and-Styles

CURRENT

Article lists English accents as: Australian, British, Canadian, Hindi, Irish, New Zealand, North American (Virginia/North Carolina, Midwestern, Mountain), Scottish, South African English, US Mexican, neutral American

SUGGESTED FIX

The actual Language and accent filter dropdown shows 51 options. English accents include: English (Australia), English (Canada), English (India), English (Ireland), English (Mexico), English (Scotland), English (South Africa), English (US–Appalachia), English (US–Midwest), English (US–Mountain West), English (US–Southeast), English (US–Texas), English (United Kingdom), English (United States). Key differences: (1) No 'New Zealand' accent exists in the dropdown, (2) 'Hindi' accent is listed as 'English (India)', (3) 'British' is 'English (United Kingdom)', (4) Regional US accents use different names (Appalachia/Southeast/Texas instead of Virginia/North Carolina), (5) English (US–Texas) and English (US–Southeast) are present but not mentioned in the article.

WHAT CHANGED

Opened the Language and accent filter dropdown on the Voices page. Extracted all 51 options via JavaScript DOM query. No 'English (New Zealand)' option exists.

API trial period stated as 14 days, but Studio trial page and pricing page say 7 days

Requesting an API Key for WellSaid · help.wellsaid.io/.../39155609824275-Requesting-an-API-Key-for-WellSaid

HELP ARTICLE

CURRENT

The article states users can 'Experience it firsthand with a 14-day trial' for API access.

SUGGESTED FIX

Align the API trial period with the Studio trial period. The 'What's Included in the WellSaid Studio Trial?' article and the Release Notes both state the free trial is 7 days. Either the API trial is genuinely different (in which case this should be clarified), or this should be corrected to 7 days.

WHAT CHANGED

Verified: WellSaid pricing page states '1-week Studio trial and a 1-week API trial'. API product page (wellsaid.io/products/api) states 'You'll have 7 days to try out all of our features.' The help article's claim of a 14-day API trial contradicts both official pages.

Outdated voice restriction dates using future tense

Access to WellSaid Voice (Tobin A.) · help.wellsaid.io/.../47141067116947-Access-to-WellSaid-Voice-Tobin-A

CURRENT

Starting December 15, 2025, Tobin A. will no longer be available on Creative, Legacy Creative, or Legacy Maker plans.

SUGGESTED FIX

Tobin A. is no longer available on Creative, Legacy Creative, or Legacy Maker plans as of December 15, 2025.

WHAT CHANGED

Article uses future tense ("will no longer be available") for a date that passed 113 days ago (today is April 7, 2026). The date December 15, 2025 is in the past. Also see FAQ stating "All content created before December 15, 2025, will remain accessible" - this wording is also stale.

Combine feature claimed to be 'only available in Standard' but Release Notes indicate it's for Caruso

How Do Unlimited Retakes Work? · help.wellsaid.io/.../39268444196755-How-Do-Unlimited-Retakes-Work

CURRENT

Please note that the Combine feature is currently only available in Standard.

SUGGESTED FIX

The Combine Clips feature was introduced in December 2025 as a Caruso project feature, not a Legacy Studio Standard model feature. Update to reflect current Caruso/modern Studio availability.

WHAT CHANGED

Release Notes (February 2026) state under December 2025: 'You can now combine multiple rendered sections into a single audio file—directly in a Caruso project.' The Caruso model is the modern, recommended model for WellSaid Studio (distinct from legacy Standard model). Page 7's claim appears to reference outdated information or an earlier product configuration.

Getting Started with WellSaid Studio

Importing a Script

Creating Audio at Different Sample Rates

Creating Sections and Clips

In Studio, you create audio inside projects as sections (in WellSaid Studio and Caruso-Legacy) or clips (in Legacy Studio – Standard and Global).

- Sections support multiple audio takes, letting you generate and compare versions of the same script.
- Clips generate a single rendered output.

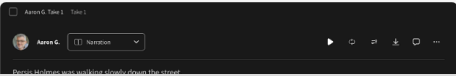

Use the steps below to create your first take and generate additional versions as needed.

Create a Section

WellSaid Studio and Caruso (Legacy) Projects

- Select a voice from the Voice Library.
- Enter or import your script into the section editor.
- Click **Play** to generate and preview the audio take.

You can generate additional takes and refine your script as needed.

Pricing page lists 'API' as a subscription plan, but API is not a self-service plan

How Much Does WellSaid Studio Cost? · help.wellsaid.io/.../39149441616531-How-Much-Does-WellSaid-Studio-Cost

CURRENT

The pricing article lists four plans: Trial, Creative, Business, and API — presenting API as a standalone subscription tier alongside consumer plans.

SUGGESTED FIX

The self-service subscription tiers are Trial, Creative, and Business. Enterprise is the fourth tier. API access is a feature available across plans (with custom pricing for dedicated API plans), not a standalone subscription tier. Update the plan list to: Trial, Creative, Business, Enterprise.

WHAT CHANGED

The 'Does WellSaid Offer Enterprise Pricing?' article describes Enterprise as a plan tier. The 'Requesting an API Key' article describes API access as a feature that can be requested, not purchased as a plan. The main [wellsaid.io](https://wellsaid.io/pricing) pricing page lists Creative, Business, and Enterprise — not API.

Pause length label mismatch: 'Short' vs 'Small' in pause options

Getting Started with WellSaid Studio · help.wellsaid.io/.../39187892094099-Getting-Started-with-WellSaid-Studio

• Use punctuation (commas, ellipses) or rephrase slightly to help the model deliver the intended tone.

Organize Your Sections

Studio makes it easy to manage and export complex scripts.

- **Rename a Section:** Click the section title, enter the new name, and click outside to save.
- **Rearrange Section:** Copy text to a new section in the right order and generate a new take.
- **Combine Sections:**
Before you begin, ensure your sections have been rendered.
1. Select multiple sections or click **Select all** at the top of the section list.
2. Click **Download** → **Download audio as: Combined file.**
3. Choose pause length (short, natural, long).
4. Name Your File. The file name is used for your downloaded audio.
5. *Optional* enable captions (SRT/VTX).

Tip: Sections combine from top to bottom; only active takes are downloaded.

HELP ARTICLE

CURRENT

Article refers to pause options as 'short, natural, long'

SUGGESTED FIX

The UI labels are 'Small (0.3 seconds)', 'Natural (0.8 seconds)', 'Long (1.2 seconds)'. 'Short' should be 'Small'. Additionally, a Custom value option (up to 10s) exists but is not documented.

WHAT CHANGED

Observed pause dropdown in Studio editor between sections. First option is labeled 'Small' not 'Short'.

Article says 'Click Avatar image above text editor' but UI shows voice avatar inline with section

Getting Started with WellSaid Studio · help.wellsaid.io/.../39187892094099-Getting-Started-with-WellSaid-Studio

CURRENT

Article instructs user to 'Click Avatar icon above editor or select See All Avatars from right sidebar'

SUGGESTED FIX

In WellSaid Studio (Caruso), the voice avatar appears inline within each section header alongside the language and style dropdown. The right sidebar shows 'See all voices' button and recently used voices. The term 'Avatar' has been largely replaced with 'Voice' in the current UI.

WHAT CHANGED

Observed section headers in Studio editor: each section shows the voice avatar image, name (e.g. 'Antony A.'), language flag and label, and style dropdown inline. Right sidebar shows 'See all voices' button, not 'See All Avatars'.

ARTICLE help.wellsaid.io/.../39187892094099-Getting-Started-with-WellSaid-Studio

Czech language missing from the supported languages list

Available Languages, Accents, and Styles · help.wellsaid.io/.../39079854241299-Available-Languages-Accents-and-Styles

CURRENT

The article lists supported global languages as: 'Arabic, Chinese (Cantonese and Mandarin), Danish, Dutch, English, French, German, Italian, Japanese, Korean, Persian, Polish, Portuguese, Spanish, Swedish, and Turkish.'

SUGGESTED FIX

Add Czech to the list. The voice library includes Czech (CZ) voices (Jakub N. and Petra S.), and the 'Creating Audio Voiceovers in Global Languages' page lists Czech as a supported language. The corrected list should include: '...Chinese (Cantonese and Mandarin), Czech, Danish, Dutch...'

WHAT CHANGED

The 'List of WellSaid Voices' page includes a 'Czech (CZ) Voices' section with two voices. The 'Creating Audio Voiceovers in Global Languages' page lists Czech among its 17 supported languages. But the 'Available Languages' page omits Czech from its summary.

ARTICLE help.wellsaid.io/.../39079854241299-Available-Languages-Accents-and-Styles

Article references 'See All Avatars' but UI shows 'See all voices'

Favoriting a Voice · help.wellsaid.io/.../39296392747923-Favoriting-a-Voice

CURRENT

Article says 'Select See All Avatars from right sidebar to open Voice Library'

SUGGESTED FIX

The right sidebar button in Studio is labeled 'See all voices', not 'See All Avatars'. The terminology has been updated from 'Avatars' to 'Voices' across the product.

WHAT CHANGED

Observed right sidebar in Studio editor showing 'See all voices' button. The Voices page URL is /dashboard/avatars but all user-facing labels say 'Voices'.

ARTICLE help.wellsaid.io/.../39296392747923-Favoriting-a-Voice

Article describes 'advanced filter' but actual UI uses dropdown filters in sidebar panel

A Hub for All Your Voices · help.wellsaid.io/.../40006390606227-A-Hub-for-All-Your-Voices

CURRENT

Article says 'Use advanced filter to quickly locate voices by characteristics and accents'

SUGGESTED FIX

The Voices page has a Filter panel on the right side with dropdown filters for: Gender, Performance style, Language and accent, Voice characteristics, and Model. There is no single 'advanced filter' button — the filters are always visible in the sidebar. The filter panel also includes category pill buttons (All, New!, Global Languages, Advertising, Clear & Direct, Diverse & Inclusive, eLearning).

WHAT CHANGED

Navigated to Voices page (/dashboard/avatars). Right sidebar shows persistent Filter panel with five dropdown categories. No 'advanced filter' toggle or button exists.

Article says 'Request API Key' button but UI shows 'Get API key'

Requesting an API Key for WellSaid · help.wellsaid.io/.../39155609824275-Requesting-an-API-Key-for-WellSaid

CURRENT

Article instructs: 'Within WellSaid API section, select Request API Key'

SUGGESTED FIX

The API page shows a button labeled 'Get API key', not 'Request API Key'. There is also a 'Contact us' button alongside it.

WHAT CHANGED

Navigated to API page (/dashboard/api). The primary CTA button is labeled 'Get API key'.

Smart Toolbar label is 'Add emphasis' not just 'Emphasis'

Rewrite for Speech and Emphasis for Smart Toolbar · help.wellsaid.io/.../46473963538323-Rewrite-for-Speech-and-Emphasis-for-Smart-Toolbar

CURRENT

Article describes 'Select Emphasis option to apply quotation marks to highlighted word'

SUGGESTED FIX

The Smart Toolbar button is labeled 'Add emphasis', not just 'Emphasis'. The toolbar also shows 'Rewrite for speech', 'Select replacement', and '+ New replacement' options.

WHAT CHANGED

Double-clicked a word in the Studio editor to trigger the Smart Toolbar. Toolbar appeared with buttons: 'Rewrite for speech', 'Add emphasis', 'Select replacement' (dropdown), '+ New replacement'.

ARTICLE help.wellsaid.io/.../46473963538323-Rewrite-for-Speech-and-Emphasis-for-Smart-Toolbar

Article says 'Toggle AI Smart Features off' but actual setting is labeled 'AI Smart Features' with Enabled/Disabled toggle

Rewrite for Speech and Emphasis for Smart Toolbar · help.wellsaid.io/.../46473963538323-Rewrite-for-Speech-and-Emphasis-for-Smart-Toolbar

CURRENT

Article says 'Team admin can turn off Smart Toolbar options in Account Settings > Settings' and 'Toggle AI Smart Features off disables all smart features'

SUGGESTED FIX

In Account Settings > Settings, the toggle is under 'Team settings' section labeled 'AI Smart Features' with description 'Enable AI-powered smart features for your team. These tools are powered by a trusted third-party LLM.' The toggle shows 'Enabled'/'Disabled' state. The article's description is functionally correct but the label path differs slightly.

WHAT CHANGED

Navigated to Account Settings > Settings tab. First section is 'Team settings' with 'AI Smart Features' toggle currently set to Enabled.

ARTICLE help.wellsaid.io/.../46473963538323-Rewrite-for-Speech-and-Emphasis-for-Smart-Toolbar

Incomplete language support list for script import

Importing a Script · help.wellsaid.io/.../44882415828883-Importing-a-Script

Connect to Tools

Support

Articles in this section

▶ Getting Started with WellSaid Studio

▶ Importing a Script

▶ Creating Audio at Different Sample Rates

▶ Creating a Longer Clip with the Combine Tool

▶ Favoriting a Voice

▶ Auditioning Voices

▶ Downloading Audio with Text

▶ Rendering by Paragraph

▶ Creating Sections and Clips

2. Click **Import Script** in the top-right corner.

3. Choose one of the following options:

- **Drag & Drop** your file into the upload window.
- **Browse and select** a file from your computer.
- **Paste a URL**. Please note that some links may not work if there are permission restrictions.

Tip: URLs must end in .txt, .pdf, or .docx. If a URL doesn't work, try downloading the file and uploading it directly.

That's it! Once uploaded, your script will appear in your Studio Editor, and you'll be ready to refine and render your audio.

Supported file types, size, and languages

• **File formats:** .txt, .pdf, .docx

• **Languages:** English, French, German, Italian, Portuguese, Spanish

FAQs

Q: Can a zip file be used to upload multiple scripts simultaneously?

A: You can only upload one file at a time in the text editor—render your audio first, then upload the next file. Zip files are not supported right now.

HELP ARTICLE

CURRENT

Languages: English, French, German, Italian, Portuguese, Spanish

SUGGESTED FIX

WellSaid Studio supports multiple additional languages beyond those listed: Arabic, Chinese (Cantonese and Mandarin), Danish, Dutch, French, German, Italian, Japanese, Korean, Persian, Polish, Portuguese, Spanish, Swedish, and Turkish

WHAT CHANGED

The article lists 6 supported import languages (English, French, German, Italian, Portuguese, Spanish). WellSaid supports 15+ languages for TTS synthesis including Arabic, Japanese, Korean, etc. However, script import may intentionally be limited to Latin-script languages due to text processing constraints. Cannot verify without testing the import feature directly.

Pause length label mismatch: article says 'Short' but UI shows 'Small'

Creating a Longer Clip with the Combine Tool · help.wellsaid.io/.../39404298753299-Creating-a-Longer-Clip-with-the-Combine-Tool

CURRENT

Article states pause options are 'Short (0.3s), Natural (0.8s), Long (1.2s)'

SUGGESTED FIX

The actual UI labels in WellSaid Studio are 'Small (0.3 seconds)', 'Natural (0.8 seconds)', 'Long (1.2 seconds)'. The shortest option is labeled 'Small' not 'Short'. There is also a 'Custom value' option (up to 10s) not mentioned in the article.

WHAT CHANGED

Clicked the pause dropdown between sections in the Studio editor. Dropdown shows: Small (0.3 seconds), Natural (0.8 seconds) [selected], Long (1.2 seconds), Custom value (Enter value up to 10s), Reset to default, Go to settings.

Download dialog uses 'Include caption files' not separate text download option

Downloading Audio with Text · help.wellsaid.io/.../39270121510675-Downloading-Audio-with-Text

CURRENT

Article describes 'Option to select text download' and 'Under Include .txt file, toggle to enable text download' in Account Settings

SUGGESTED FIX

The download dialog in Studio shows 'Include caption files' as an expandable section. The Account Settings > Settings page shows 'Global download' toggle for setting default file format, but no separate '.txt file' toggle was visible. The download modal offers caption files (SRT/VTT) rather than a standalone .txt option.

WHAT CHANGED

Opened the Download dialog by selecting all 7 sections and clicking Download. Dialog shows: Audio file (.mp3/.wav/.ogg), Download audio as (Individual files / Combined file), File naming options, and 'Include caption files' expandable section.

ARTICLE help.wellsaid.io/.../39270121510675-Downloading-Audio-with-Text

How to read it

WellSaid Drift Monitor compares your published content with your sources of truth on every scan. When they disagree it raises an alert with the evidence, where it appears and a suggested fix. Severity reflects how likely the gap is to mislead a learner or customer: critical first, then warning, then info.

Findings are advisory. Please verify content before making changes.
