Article says sections "cannot be reordered directly" — Studio added drag-and-drop in May 2026

Reorder, Move, and Copy Sections or Clips · help.wellsaid.io/.../39122443786899-Reorder-Move-and-Copy-Sections-or-Clips

CURRENT

Article says 'Sections cannot be reordered directly. To move a section:'

SUGGESTED FIX

WellSaid Studio now supports drag-and-drop section reordering as of May 2026. The copy/recreate workaround is still correct for Caruso (Legacy). Article should split guidance by mode rather than apply the workaround to WellSaid Studio.

WHAT CHANGED

The May 2026 Release Notes added 'Section Reorder: Drag and Drop — You can now reorder sections in Studio by dragging them to a new position using the icon to the right of the section.' The Reorder, Move, and Copy article still groups WellSaid Studio with Caruso (Legacy) under 'Sections cannot be reordered directly', describing only the legacy copy/recreate workaround. Users on new Studio following these steps will waste time regenerating takes when they could drag.

Getting Started

Getting Started guide describes outdated copy-text rearrange workaround for sections

Getting Started with WellSaid Studio · help.wellsaid.io/.../39187892094099-Getting-Started-with-WellSaid-Studio

• Some questions need guidance to achieve a natural upward inflection.

• Use punctuation (commas, ellipses) or rephrase slightly to help the model deliver the intended tone.

Organize your sections

Studio makes it easy to manage and export complex scripts.

- **Rename a section:** Click the section title, enter the new name, and click outside to save.
- **Rearrange sections:** Copy text to a new section in the right order and generate a new take.
- **Combine sections:** Before you begin, ensure your sections have been rendered.
 1. Select multiple sections or click **Select all** at the top of the section list.
 2. Click **Download** → **Download audio as: Combined file**.
 3. Choose a pause length: Small (0.3 seconds), Natural (0.8 seconds), Long (1.2 seconds), or a Custom value up to 10 seconds.
 4. Name your file. The file name is used for the downloaded audio.
 5. *Optional:* Enable captions (SRT/VTX).

Sections combine from top to bottom. Only active takes are downloaded.

HELP ARTICLE

CURRENT

Article says 'Rearrange sections: Copy text to a new section in the right order and generate a new take.'

SUGGESTED FIX

WellSaid Studio added drag-and-drop section reorder in May 2026 — the Getting Started guide should describe the new drag method rather than the legacy copy/regenerate workaround.

WHAT CHANGED

The May 2026 Release Notes added 'Section Reorder: Drag and Drop — You can now reorder sections in Studio by dragging them to a new position using the icon to the right of the section.' The Getting Started with WellSaid Studio article still recommends the legacy workaround that requires copying text and regenerating a take, which is no longer the recommended path for the new Studio.

Collaboration and Permissions

Team Voices article says 'bookmark icon' but live UI and other articles say 'heart icon'

Adding Favorites to Your Team Voices · help.wellsaid.io/.../39579059077395-Adding-Favorites-to-Your-Team-Voices

LIVE UI

Heart icon on the Aakash K. voice card — first of two icons (heart + bookmark) sitting between the 'Narration (Caruso)'

SUGGESTED FIX

The live Studio UI uses a heart icon for favoriting voices. The sibling article 'Favoriting a Voice' (updated the same day) correctly describes clicking the 'heart icon on the voice card.' The 'Getting Started with WellSaid Studio' article also says 'clicking the heart icon on the voice card.' Update 'bookmark icon' to 'heart icon' for consistency with the live UI and other help articles.

WHAT CHANGED

Three sources confirm the heart icon: (1) The 'Favoriting a Voice' article (updated 2026-04-17) says 'Click the heart icon on the voice card to add it to Favorites.' (2) The 'Getting Started with WellSaid Studio' article (updated 2026-04-15) says 'Save frequently used Voices by clicking the heart icon on the voice card.' (3) The previous scan's UI audit (carried-forward issue on 'A Hub, for All Your Voices') confirmed the live Studio uses a heart icon for favoriting/unfavoriting. The 'Adding Favorites to Your Team Voices' article (also updated 2026-04-17) uses 'bookmark icon' which contradicts all three sources. [Mode B UI audit: CONFIRMED: Button says 'Save to favorites' (text), not bookmark or heart icon]

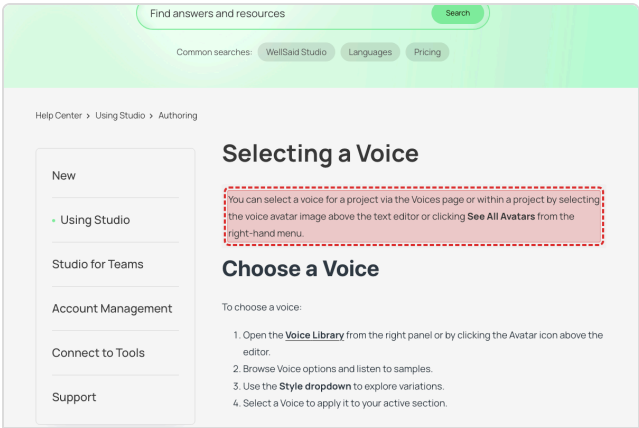

ARTICLE help.wellsaid.io/.../39579059077395-Adding-Favorites-to-Your-Team-Voices

LIVE UI

Aakash K. voice card (top-left card in grid) — the current voice-selector UI element replacing 'voice avatar image'

SUGGESTED FIX
Replace 'voice avatar image' with the current voice selector UI element name.

WHAT CHANGED

WellSaid has renamed all 'Avatar' references to 'Voices' throughout the product UI. [Mode B UI audit: CONFIRMED: Voice cards show name + Play/Favorites/Use buttons, no 'voice avatar image']

Article says 'Voice Library' — dialog is now titled 'Voices'

Selecting a Voice · help.wellsaid.io/.../39110365408403-Selecting-a-Voice

New

Using Studio

Studio for Teams

Account Management

Connect to Tools

Support

Selecting a Voice

You can select a voice for a project via the Voices page or within a project by selecting the voice avatar image above the text editor or clicking **See All Avatars** from the right-hand menu.

Choose a Voice

To choose a voice:

1. Open the **Voice Library** from the right panel or by clicking the Avatar icon above the editor.
2. Browse Voice options and listen to samples.
3. Use the **Style dropdown** to explore variations.
4. Select a Voice to apply it to your active section.

FAQs

Combine feature claimed to be 'only available in Standard' but Release Notes indicate it's for Caruso

How Do Unlimited Retakes Work? · help.wellsaid.io/.../39268444196755-How-Do-Unlimited-Retakes-Work

The screenshot shows a help article page. On the left is a sidebar with a 'Connect to Tools' section containing a 'Support' link, and an 'Articles in this section' list with five items. The main content area features a video player. A red dashed box highlights a text note below the video: 'Please note that the Combine feature is currently only available in Standard.' Below the video is a section titled 'What counts toward my download limit?' with a partially visible sentence: 'Once you've downloaded a clip, take, or used the combine feature, each one will count.'

HELP ARTICLE

CURRENT

Please note that the Combine feature is currently only available in Standard.

SUGGESTED FIX

The Combine Clips feature was introduced in December 2025 as a Caruso project feature, not a Legacy Studio Standard model feature. Update to reflect current Caruso/modern Studio availability.

WHAT CHANGED

Release Notes (February 2026) state under December 2025: 'You can now combine multiple rendered sections into a single audio file—directly in a Caruso project.' The Caruso model is the modern, recommended model for WellSaid Studio (distinct from legacy Standard model). Page 7's claim appears to reference outdated information or an earlier product configuration.

Integrations

References 'Canva project' but article is about Adobe Express integration

WellSaid Studio for Adobe Express · help.wellsaid.io/.../39187648788243-WellSaid-Studio-for-Adobe-Express

Want to see it in action? Check out Adobe's demo with the new add-on!

Creating voiceovers in Studio for your Adobe Express project

With a WellSaid subscription, you can craft clips containing up to 5,000 characters or combine longer clips and seamlessly integrate them into your Canva project.

1. In Studio, navigate to **Projects** from the left-hand menu.
2. Locate and click on the project labeled "Adobe."
3. Create and perfect your voiceovers for your Adobe Express project.
4. Switch to your project in Adobe Express, then, in the WellSaid app, click **Clips**.
5. Your newly created clips are now ready to be added to your project's timeline.

Viewing clips

To view clips you've created, click **Clips** at the top of the add-on.

HELP ARTICLE

CURRENT

With a WellSaid subscription, you can craft clips containing up to 5,000 characters or combine longer clips and seamlessly integrate them into your Canva project.

SUGGESTED FIX

With a WellSaid subscription, you can craft clips containing up to 5,000 characters or combine longer clips and seamlessly integrate them into your Adobe Express project.

WHAT CHANGED

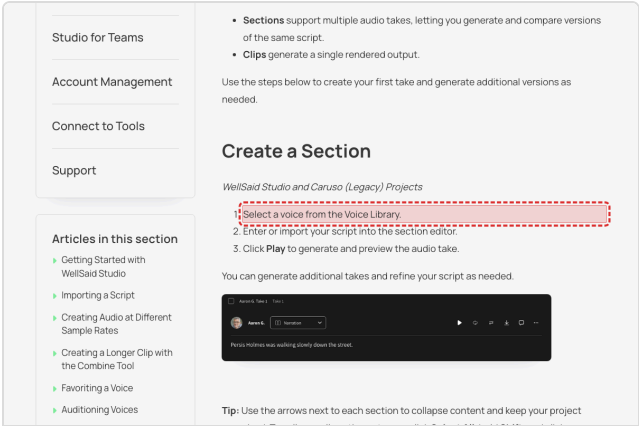

The entire article is titled 'WellSaid Studio for Adobe Express' and focuses on Adobe Express integration. The page describes the Adobe Express add-on workflow. The mention of 'Canva' appears to be a copy-paste error from documentation for a different platform or product. Canva is a separate design platform, not Adobe Express.

5. Click **Invite**, and your team member will receive an invitation email in their inbox.

Build your list of approved team voices

Ensure every audio output reflects your brand by [creating a curated list of approved voices](#) for your team. This feature streamlines the voice selection process for your team across projects, saving time and ensuring a consistent brand experience across all touchpoints.

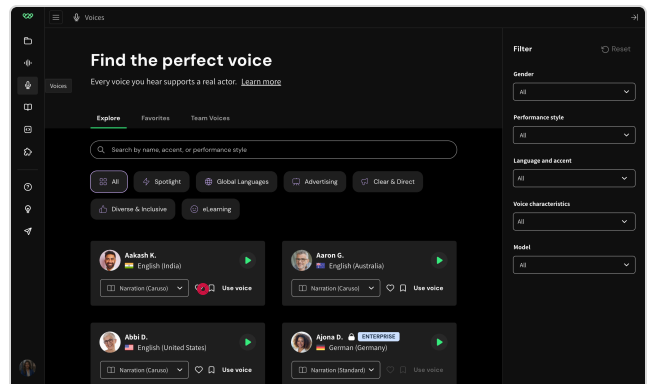

1. In Studio, navigate to the left menu to open the Voices page.
2. Choose a voice and style you wish to favorite from the **Explore** or **All** tabs.
3. Click the vertical ellipses (those three dots) next to the desired voice.
4. Select **Add to Team Voices** to save to your favorites list.
5. Your newly saved favorite voice will now appear in the Team Voices tab on the Voices page.

Create Workspaces for smaller groups

Enterprise customers can further segment team workflow into smaller groups by [creating a workspace](#). Workspaces allow you to invite team members to a shared workspace where only invited members will have access to projects.

1. In Studio, navigate to your **Projects** page.

ARTICLE SCREENSHOT

LIVE UI

Heart icon on the Aakash K. voice card — replaces the article's 'vertical ellipses' workflow for favoriting/team-voicing

SUGGESTED FIX

Update to use the current heart/bookmark icon workflow for adding team voices.

WHAT CHANGED

Live Voices panel uses heart icon for favoriting, not three-dot menu. [Mode B UI audit: CONFIRMED: 'Save to favorites' text button, no 'vertical ellipses']

Article says 'Select Account Settings > Settings from the left menu' — current Account Settings uses a left-rail menu, not horizontal tabs

WHAT CHANGED

Article's 'from the left menu' instruction and the new Insights dashboard article both confirm the current Account Settings layout uses left-menu navigation. Horizontal-tabs Account page is older UI.

Warning

Video

'Current / Future BETA' version dropdown has been restructured

Tutorial: Create Clips · <https://www.youtube.com/watch?v=8S9M01NwEpw>

ARTICLE SCREENSHOT

Third (bottom-most) input row of the 'Create a new project' modal showing the 'Current' dropdown with chevron; click-cir

SUGGESTED FIX

The narrator says 'select the current version of Studio' but the Current/Future BETA dropdown was replaced by three radio cards under 'Choose your Studio experience' — 'WellSaid Studio (recommended)', 'Legacy Studio - Standard', 'Legacy Studio - Global'. The 'current' option was demoted to 'Legacy Studio - Standard' (which is what this tutorial actually demonstrates). A viewer following along will not find a 'current version' selector.

WHAT CHANGED

Current-app capture: 'New project' modal shows three radio cards -- 'WellSaid Studio' (RECOMMENDED), 'Legacy Studio - Standard', 'Legacy Studio - Global' (with additional language dropdown).

A recreation plan for this video is available in Drift Monitor.

LIVE UI

entire redesigned 'Voices' modal -- header tabs (Explore/Favorites/Team voices), category pill bar, voice-card grid, and

SUGGESTED FIX

The voice picker is now titled 'Voices' (an explicit modal heading the video predates), with tabs Explore / Favorites / Team voices, a category pill bar (All / Spotlight / Global Languages / Advertising / Clear & Direct / Diverse & Inclusive / eLearning), and a right-hand Filter panel with dropdowns for Gender / Performance style / Language and accent / Voice characteristics / Model. Each voice card shows a country flag, a model chip (e.g. 'Narration (Caruso)'), a heart icon + bookmark, and an explicit 'Use voice' button -- replacing the 3-dot overflow.

WHAT CHANGED

Current-app capture of the Voices modal shows all these elements. This is a complete visual overhaul, not a rename.

A recreation plan for this video is available in Drift Monitor.

restrictions.

Tip: URLs must end in .txt, .pdf, or .docx. If a URL doesn't work, try downloading the file and uploading it directly.

That's it! Once uploaded, your script will appear in your Studio Editor, and you'll be ready to refine and render your audio.

Supported file types, size, and languages

- File formats: .txt, .pdf, .docx
- Languages: English, French, German, Italian, Portuguese, Spanish

FAQs

Q: Can a zip file be used to upload multiple scripts simultaneously?

A: You can only upload one file at a time in the text editor—render your audio first, then upload the next file. Zip files are not supported right now.

Q: My file won't upload - what's wrong?

A: Check that your file is in .txt, .pdf, or .docx format, that the file is not too large, and that the script is not heavily formatted with bold, italic, or strikethrough text, emojis, etc. If you're still unable to upload your script, reach out to [Support](#) for further assistance.

Article overview

WellSaid Studio supports a growing collection of global languages, English accents, and voice styles, giving you the flexibility to create professional voiceovers for any audience.

Language variety

We support several global languages:

Arabic	French	Polish
Chinese (Cantonese)	German	Portuguese
Chinese (Mandarin)	Italian	Spanish
Czech	Japanese	Swedish
Danish	Korean	Turkish
Dutch	Persian (Farsi)	

For information on accessing additional languages, contact our [sales team](#).

Accents

HELP ARTICLE

SOURCE

SUGGESTED FIX

WellSaid Studio supports multiple additional languages beyond those listed: Arabic, Chinese (Cantonese and Mandarin), Danish, Dutch, French, German, Italian, Japanese, Korean, Persian, Polish, Portuguese, Spanish, Swedish, and Turkish

WHAT CHANGED

The article lists 6 supported import languages (English, French, German, Italian, Portuguese, Spanish). WellSaid supports 15+ languages for TTS synthesis including Arabic, Japanese, Korean, etc. However, script import may intentionally be limited to Latin-script languages due to text processing constraints. Cannot verify without testing the import feature directly.

Pronunciation

Typo 'orignal' instead of 'original' in Pronunciation Best Practices

Pronunciation Best Practices · help.wellsaid.io/.../39076041586707-Pronunciation-Best-Practices

Create a Phonetic Respelling

Create a Respellings to manually break a word into syllables and mark which ones to stress.

Example: Triiodothyronine → "try-yuh-uh-doo-THY-ruh-noon"

Create a Text Replacement

Create a Replacement to substitute a word, term, or phrase with an alternative spelling when the original pronunciation is otherwise ambiguous.

Example: 1099-MISC, tax form

Voices will vocalize as "ten ninety-nine M I S C"

Add a Replacement so the voice will always say "ten ninety-nine Mi

Emphasize a word or phrase

HELP ARTICLE

CURRENT

Article says 'when the orignal pronunciation is otherwise ambiguous'

SUGGESTED FIX

Should read 'when the original pronunciation is otherwise ambiguous'

WHAT CHANGED

The word 'orignal' in the 'Create a Text Replacement' section is a clear misspelling of 'original'. This typo exists in the current crawled text (updated 2026-04-18).

Getting Started

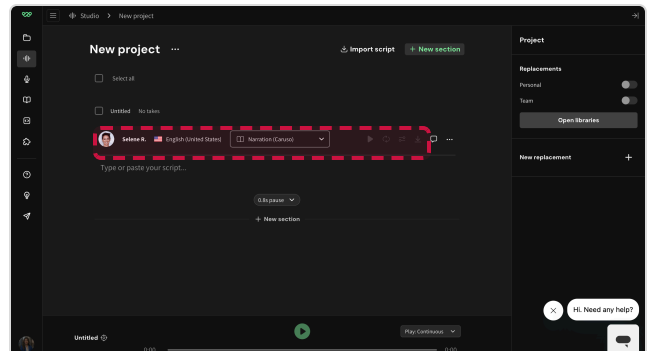

Pre-redesign WellSaid Studio editor (missing flag/language, 'Swap voice' rail header, 'Caruso' mode tag in breadcrumb)

Downloading Clips, Sections, and Projects · help.wellsaid.io/.../39110184357267-Downloading-Clips-Sections-and-Projects

ARTICLE SCREENSHOT

Right-rail header 'Swap voice' with Recently used/Favorites — pre-redesign editor chrome

LIVE UI

Section row showing voice avatar + country flag + 'English (United States)' label + 'Narration (Caruso)' model dropdown

SUGGESTED FIX

Current WellSaid Studio section rows show voice + country flag + language label + model dropdown (editor-with-voice ref); right rail is 'Project > Replacements' with Personal/Team toggles + 'Open libraries' + 'New replacement'; breadcrumb is just 'Studio > New project' without a Caruso tag

WHAT CHANGED

editor-with-voice ref shows 'Selene R. | flag | English (United States) | Narration (Caruso)'. This screenshot's section row lacks flag+language. right-rail-voices ref does not include a 'Swap voice' header.

How to read it

WellSaid Drift Monitor compares your published content with your sources of truth on every scan. When they disagree it raises an alert with the evidence, where it appears and a suggested fix. Severity reflects how likely the gap is to mislead a learner or customer: critical first, then warning, then info.

Findings are advisory. Please verify content before making changes.
