DR-0089 Warning Text New Marketing Site

The number of supported languages is stated three different ways: 30+ on the marketing page, 17 on the corporate-communications page, and 18 in the marketing page's own language list

AI Voice Generator & Text to Speech for Marketing | WellSaid · <https://www.wellsaid.io/industries/voice-ai-marketing>

The screenshot shows a website interface for an AI voice generator. On the left, there is a grid of eight voice actor profiles, each with a profile picture, name, and language/region code (e.g., 'Veer S. English (IN 🇮🇳)'). To the right of the grid is a section titled 'GLOBAL LANGUAGES' with the heading 'Scale your brand voice globally'. Below this heading is a red dashed box containing the text: 'Maintain consistent brand voice across product videos, paid ads, landing pages, and global campaigns with support for 30+ languages and 120+ studio-quality voices.' Below the red box is a link that says 'Explore our voices'. At the bottom of the screenshot, there is a black bar with the text 'HELP ARTICLE'.

CURRENT
support for 30+ languages and 120+ studio-quality voices

SUGGESTED FIX
Pick one supported-language figure and use it everywhere. The marketing page promises 30+ languages, but the table further down that same page lists 18 languages (Arabic, Cantonese, Czech, Danish, Dutch, English, French, German, Italian, Japanese, Korean, Mandarin, Persian, Polish, Portuguese, Spanish, Swedish, Turkish), and the corporate-communications page says 17. Confirm the current count and align all three, or say plainly what is being counted — languages only, or languages plus regional accents.

WHAT CHANGED

The marketing page (changed this week) says 'support for 30+ languages and 120+ studio-quality voices'. Its own 'Supported languages & accents' table lists only 18 languages. The corporate-communications page says 'Deliver the same message clearly across 17 languages and 280+ AI voices'. Two other pages (corporate-training, social-media-content) say '50+ languages & accents', which counts accents too and so isn't directly comparable. A buyer checking whether their language is covered gets 17, 18, or 30+ depending on which page they land on. NOTE (R2): the '120+ ... voices' half of this same sentence is a new instance of the existing carry-forward finding 'homepage-voice-count-120-vs-280-inconsistency' — it is deliberately NOT re-flagged here, but that carry-forward should be extended to also cite <https://www.wellsaid.io/industries/voice-ai-marketing> and <https://www.wellsaid.io/solutions/advertising>.

DR-0090 Warning Text New Replacements

Rewritten Respellings article sends readers to a "Pronunciation Library page" while using the new Replacements wording everywhere else in the same steps

Using Respellings · help.wellsaid.io/.../39188339794451-Using-Respellings

resPELLing cannot contain Q or X.	specific phonetic sound mappings. Those sounds are represented with other characters.	Review the Respelling Reference Charts to find the equivalent letter.	☒ ing-ZAM-puhl ☐ EX-am-puhl
-----------------------------------	---	---	---

Still getting an error?

If you previously added respellings to your **Pronunciation Library** that contain diacritics or special characters, pronunciation may fail. Try:

- Removing the special characters
- Updating the respelling in the **Pronunciation Library** page

FAQs

Q: What's the difference between a respelling and a replacement?

A: A respelling controls *how* a word is pronounced using phonetic spelling. A replacement swaps the written text with different spoken words. Both are created through the **Replacements panel**—enabling the **Phonetic Respelling** toggle converts a replacement into a pronunciation rule.

Q: Can I reuse a respelling across multiple projects?

A: Yes. Save the respelling to your **Pronunciation Library**, and it will apply consistently wherever that word appears across your projects.

HELP ARTICLE

CURRENT

Updating the respelling in the Pronunciation Library page

SUGGESTED FIX

Use one name for this area throughout the article. The rest of the article already uses the current wording — 'Replacements panel', '+ New replacement', 'Replacement field' — so the remaining 'Pronunciation Library' references should be updated to match what a reader actually sees in the left menu ('Libraries'). A reader following these steps looks for a 'Pronunciation Library page' that isn't labelled that way in the product.

WHAT CHANGED

This article was substantially rewritten this week (866 to 1,167 words, updated 2026-07-14). The new copy tells readers 'In the Smart Toolbar, click + New replacement.' and describes 'The Replacements panel opens in the right sidebar', but the same steps then say 'Save the entry to your Pronunciation Library' and, under troubleshooting, 'Updating the respelling in the Pronunciation Library page'. So one freshly-updated article uses both the old and the new name for the same place. The older wording also persists in eight other Help Center articles. NOTE (R2): this overlaps the existing carry-forward finding 'img-39079455127827-terminology-1', which covers the same rename but only as it appears in a screenshot. This is a separate fix (rewriting body copy rather than retaking a screenshot), so it is written up here rather than dropped — if you would rather track it as one item, fold it into 'img-39079455127827-terminology-1' and widen that finding's scope to the article text.

ARTICLE SCREENSHOT

Green 'NEW WORD' button, now 'New Replacement'

LIVE UI

'New replacement' panel header in the right-side script-editor side panel (Section 1 > New replacement). Demonstrates th

SUGGESTED FIX

The library page is now called 'Libraries' and the primary action button to add a replacement is 'New Replacement' (not 'NEW WORD'). Per the terminology rubric, 'PRONUNCIATION' has been renamed to 'Replacements' product-wide.

WHAT CHANGED

Article body references navigating to 'Pronunciation from the left menu' but live Studio left-nav now uses 'Libraries' (see right-rail-voices.png reference showing 'Open libraries' and 'New replacement' instead of 'New word'). Related article 39113078033555 text explicitly says 'select New Replacement' when adding from the library, confirming the current button label.

Image

Replacements

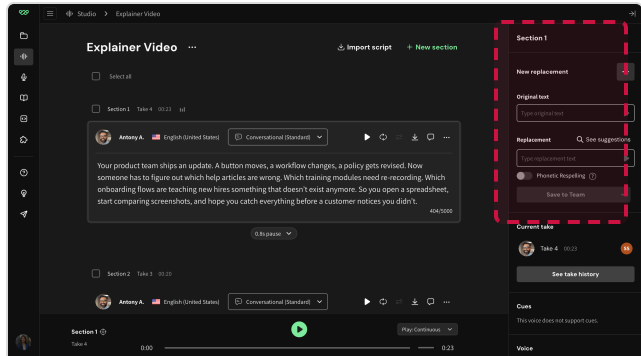

Pronunciation Library screenshot shows outdated 'MY LIBRARY' page with alphabetical index and old button labels

Applying Respelling Suggestions · help.wellsaid.io/.../39106324166547-Applying-Respelling-Suggestions

ARTICLE SCREENSHOT

'MY LIBRARY' page title, now 'Libraries'

LIVE UI

Right-rail 'New replacement' form (Section 1 header through Save to Team) — the modern equivalent of the legacy MY LIBRARY page

SUGGESTED FIX

Current Studio navigation labels this area 'Libraries' (not 'MY LIBRARY') and the product-wide rename replaces 'Pronunciation/My Library' terminology with 'Replacements'. The legacy alphabetical listing UI no longer appears; users open the Replacements panel from the right sidebar ('Open libraries') or the Libraries page from the left navigation.

WHAT CHANGED

Article body says 'Head to the Library from the left-hand menu' and references the 'Replacements panel' and 'Replacement toolbar'. Reference right-rail-voices.png shows 'Replacements' header with an 'Open libraries' button and no alphabetical 'MY LIBRARY' view. Terminology rubric: 'PRONUNCIATION' right rail gone, replaced with 'Replacements'.

Sonny G. retirement notice is still written as a future event, but the May 20, 2026 retirement date has already passed

Retiring Sonny G. from the WellSaid Voice Library · help.wellsaid.io/.../51806828542099-Retiring-Sonny-G-from-the-WellSaid-Voice-Library.

Help Center > New > WellSaid News

Retiring Sonny G. from the WellSaid Voice Library

Article overview

On May 20, 2026, Sonny G.'s voice will be retired from the WellSaid Voice Library. Find out what's affected and discover similar voices available on your plan.

At WellSaid, every voice in our library is created in partnership with a real voice actor. To support their ongoing rights and maintain the quality of our Voice Library, we occasionally need to remove a voice when licensing terms change.

What's changing

On May 20, 2026, Sonny G.'s voice will no longer be available to generate new audio or edit existing audio. Previously generated audio will still be accessible and available to download after May 20.

If you have a project that depends on Sonny G. and need help figuring out the transition.

HELP ARTICLE

CURRENT

On May 20, 2026, Sonny G.'s voice will be retired from the WellSaid Voice Library.

SUGGESTED FIX

The stated date has already passed. is already retired. The article still frames the change in future tense ('will be retired', 'will no longer be available'), which reads to a customer as though the voice is still available and the change hasn't happened yet. Rewrite in present/as-of framing (e.g. 'As of May 20, 2026, Sonny G.'s voice is no longer available to generate or edit audio; previously generated audio remains available to download.').

WHAT CHANGED

Article 51806828542099 (last updated 2026-06-29, unchanged in word count from the prior crawl) still reads 'On May 20, 2026, Sonny G.'s voice will be retired from the WellSaid Voice Library' and 'On May 20, 2026, Sonny G.'s voice will no longer be available to generate new audio or edit existing audio.' The stated date has already passed. This is the same future-tense-past-date staleness pattern already flagged on the Legacy-migration preview article (51253958068755), but on a different page, and it is not present in the carried-forward finding set for this scan.

Migrating Legacy Projects

Enterprise plans. Learn what changes for your plan and how to keep your projects moving.

At WellSaid, every voice in our library is created in partnership with a real voice actor. To support their ongoing rights and maintain the quality of our Voice Library, we occasionally need to adjust a voice's availability across plans. These changes don't happen often, but they're necessary to keep our library consistent with licensing agreements.

What's changing

Starting May 20, 2026, Tobin A. will only be available on managed Business and Enterprise plans.

If you're on a self-service Business plan, here's what changes on May 20:

- You can download content you've already made with Tobin A., anytime.
- New audio can't be generated and existing audio can't be edited with Tobin A.'s voice.

To keep access to Tobin A., upgrade to a managed Business or Enterprise plan. Contact your Voice Team or WellSaid support for help.

Similar voices on your plan

HELP ARTICLE

CURRENT

Starting May 20, 2026, Tobin A. will only be available on managed Business and Enterprise plans.

SUGGESTED FIX

The stated date has already passed. The article still uses future tense ('Starting May 20, 2026... will only be available', 'here's what changes on May 20'), which reads as though self-service Business users still have access and the change is upcoming. Rewrite in present/as-of framing (e.g. 'As of May 20, 2026, Tobin A. is available only on managed Business and Enterprise plans.').

WHAT CHANGED

Article 47141067116947 (last updated 2026-06-29, unchanged in word count from the prior crawl) still reads 'Starting May 20, 2026, Tobin A. will only be available on managed Business and Enterprise plans' and 'If you're on a self-service Business plan, here's what changes on May 20'. The stated date has already passed. Same future-tense-past-date staleness pattern as the Sonny G. retirement notice and the Legacy-migration preview article; not present in the carried-forward finding set for this scan.

Migrating Legacy Projects to WellSaid Studio

Article overview

Over the next few months, we'll be retiring our legacy projects. Starting June 1, 2026, you'll be able to migrate legacy projects into WellSaid Studio — one at a time, at your own pace. This article covers what's changing, what to expect, and what you can do to prepare.

What's changing

WellSaid Studio is our current Studio experience, and it's available to all customers today. It includes access to our Standard and Caruso voice models, along with everything else you would expect from Studio.

Some accounts also have legacy projects — projects created in our previous Studio UI before WellSaid Studio existed, including older Standard, Global, Beta, and Caruso project types. These will be retired over the coming months.

HELP ARTICLE

CURRENT

Starting June 1, 2026, you'll be able to migrate legacy projects into WellSaid Studio — one at a time, at your own pace.

SUGGESTED FIX

The stated date has already passed. This older preview article (created 2026-04-29) should be rewritten in present/as-of framing (e.g. 'You can now migrate your legacy projects into WellSaid Studio — one at a time, at your own pace.') and the line 'We'll be sharing a complete migration guide in June.' should be replaced with a link to the now-published guide. Consider whether this preview article is still needed at all now that the full guide and FAQs exist, or redirect it.

WHAT CHANGED

Article 51253958068755 (last updated 2026-06-05) still reads 'Starting June 1, 2026, you'll be able to migrate legacy projects', 'Migration is not automatic. Starting in June, you'll be able to migrate projects one at a time', and 'We'll be sharing a complete migration guide in June.' The stated date has already passed. Migration is already live: the companion guide 51751205121299 (published 2026-05-15) uses present tense ('you can migrate your legacy projects') and the dated timeline table lists 'June 1, 2026 — Migration opens.' Readers are told migration is a future capability and that a complete guide is still forthcoming, when both already exist. Same future-tense staleness pattern as the carried-forward May 20 findings (Sonny G. / Tobin A.) but on a different page and date, so not a duplicate of any carry-forward.

Security page commits to WCAG 2.1 accessibility compliance "by 2025" — a deadline that has already passed

Most Secure Text to Speech AI Voice Generator | WellSaid · <https://www.wellsaid.io/features/features-security>.

The screenshot shows a security page for WellSaid. On the left is a large blue vertical bar. To its right is a white box containing several sections: 'We have a comprehensive content moderation platform...', 'Regulation & compliance', 'Patented, closed AI model', 'U.S. hosted, secure data', and 'Accessibility'. The 'Accessibility' section is highlighted with a red dashed box and contains the text: 'We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.' Below this is a link 'Read our White Paper'. To the right of the white box is a blue vertical bar. At the bottom of the white box is a section titled 'Tailored for global teams'. To the right of the white box is a blue vertical bar. At the bottom of the white box is a section titled 'Enterprise security'. Below the white box is a blue vertical bar. At the bottom of the white box is a section titled 'HELP ARTICLE'.

CURRENT

We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.

SUGGESTED FIX

The stated date has already passed. Either update the date to the current/next target year, restate as completed ('As of 2025, we meet WCAG 2.1...'), or remove the forward-looking deadline. A prospect or procurement/legal reviewer reading an overdue compliance commitment on the security page may read it as an unmet obligation.

WHAT CHANGED

This page (<https://www.wellsaid.io/features/features-security>; the prior [/features/security](https://www.wellsaid.io/features/security) page was removed). Its Accessibility section reads 'We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.' The stated date has already passed. The rest of the section is forward-looking ('working towards'), so the page implies the WCAG 2.1 goal is still in progress past its own deadline. Not present in the carried-forward finding set.

ARTICLE <https://www.wellsaid.io/features/features-security> **FIRST SEEN** 2026-06-21 — also in 15 prior scans

Articles in this section

- Requesting an API Key for WellSaid
- Viewing API Character Usage

1. Sign up for a free account or log in to your WellSaid account.
2. From the left navigation menu, locate and click on **API**.
3. Within the WellSaid API section, select **Request API Key**.
4. Complete the provided form with a short description of how you plan to use our API in your product.
5. Click **Submit Request**.
6. Your API key will generate and appear in the **API Plan** section. Copy your new API key!

What to Expect Next

- Enjoy a 14-day trial period to explore and test our API capabilities.
- The trial includes up to 50 calls and access to all our voice avatars.
- Our dedicated team will collaborate with you during the trial to guide you through the next steps and build the right plan for your business.
- Want to learn more? [Contact us](#) today.

Explore our API

- Explore our [API documentation](#) for a deeper understanding of our API capabilities.
- Test out features using our open playground.

And that's it! Following these steps will set you on the path to obtaining your API key and obtaining the full potential of WellSaid in your application. If you have any issues...

HELP ARTICLE

CURRENT

Enjoy a 14-day trial period to explore and test our API capabilities.

SUGGESTED FIX

Confirm the correct trial length and align both pages. The 7-day figure matches the Studio free-trial length, so verify which one is current — then update this article or the API landing page (<https://www.wellsaid.io/text-to-speech-api>) to match.

WHAT CHANGED

This Help Center article (updated June 29) says 'Enjoy a 14-day trial period to explore and test our API capabilities.' The public API page at [wellsaid.io/text-to-speech-api](https://www.wellsaid.io/text-to-speech-api) says 'Signing up for an API trial is free and easy. You'll have 7 days to try out all of our features.' Both describe the same API trial, so a developer comparing the two can't tell whether it's 7 or 14 days.

Marketing Site

The number of available voices is stated two different ways on the same homepage: 120+ in two places, 280+ in another

Most Realistic AI Voice Generator | WellSaid · <https://www.wellsaid.io/>

CURRENT

Browse 280+ realistic voices and preview them in your script.

SUGGESTED FIX

Pick one voice-count figure and use it consistently. The homepage says both '120+' (twice) and '280+' (once); the industry pages (financial-services, healthcare) also use '280+'. Confirm the correct current count and align every marketing page to the same number.

WHAT CHANGED

The homepage (grew ~17% this week) contradicts itself on the voice count. It says 'Choose from 120+ natural-sounding AI voices ... across accents, languages, and styles' and 'Pick from 120+ natural styles', but the 'PICK A VOICE' section says 'Browse 280+ realistic voices and preview them in your script.' Neither number is qualified as a subset (e.g. English-only), so a visitor can't tell whether there are 120 or 280 voices. The same '280+' boilerplate also appears on /industries/financial-services-voice-ai and /industries/voice-ai-healthcare, so the inconsistency is site-wide. Not present in the carried-forward finding set.

Support

Support article promises chat replies 'within 1 hour', but the pricing page says Business chat is a 4-hour SLA (only Enterprise/Priority is 1 hour)

Finding WellSaid Support Options · help.wellsaid.io/.../39078756560915-Finding-WellSaid-Support-Options

The WellSaid Help Center is a self-serve knowledge base with guides, how-tos, and answers to commonly asked questions — available anytime, no login required.

Onboarding support

Business and Enterprise accounts may include an onboarding kickoff call to help your team get started with WellSaid Studio best practices.

Response and resolution times

Chat: Within 1 hour during open hours.

Email: Usually within 1 business day.

If an issue can't be resolved during a chat or email conversation, your support agent will keep you updated on expected resolution times.

Still need help? Email us at support@wellsaidlabs.com or use the **chat icon** in WellSaid Studio during open hours.

FAQs

Q: Is live chat available on all plans?

A: No. Live chat is available for Business and Enterprise customers only. All customers can reach Support via email.

HELP ARTICLE

CURRENT

Chat: Within 1 hour during open hours.

SUGGESTED FIX

Align the chat response time between the Help Center and the pricing page. The pricing page distinguishes Business 'Live Chat (4 hour SLA during business hours)' from Enterprise 'Priority Chat (1 hour SLA during business hours)', but this support article gives a single blanket 'within 1 hour' for all chat customers. Either scope the 1-hour figure to Priority/Enterprise chat or update the pricing SLA to match.

WHAT CHANGED

This Help Center article (updated 2026-07-06, changed this week) lists chat as available for Business and Enterprise customers and, under 'Response and resolution times', states 'Chat: Within 1 hour during open hours.' The pricing page (<https://www.wellsaid.io/ai-voice-pricing>) instead promises Business 'Email (1 business day SLA) and Live Chat (4 hour SLA during business hours)' and reserves the 1-hour figure for Enterprise: 'Priority Chat (1 hour SLA during business hours)'. A self-service Business customer reading the support article expects a 1-hour chat reply that the pricing SLA doesn't guarantee. Not present in the carried-forward finding set.

Marketing Site

Contact Sales page shows a 4.6 G2 rating while eleven other pages show 4.7

Contact Our AI Voice Generation Sales Team · <https://www.wellsaid.io/contact-sales>

Get in touch with sales

Need voiceovers that scale with your business?
WellSaid is the #1 AI voiceover solution trusted by more than half of the Fortune 500.

- ✓ Studio-quality output with built-in commercial rights
- ✓ Team workspaces, shared libraries, and collaboration tools
- ✓ Admin controls, SSO, and enterprise-grade security

HELP ARTICLE

CURRENT

4.6 rating

SUGGESTED FIX

Update the Contact Sales page to the same G2 rating used across the rest of the site (4.7), or refresh every page at once if the score has moved. Right now this page is the only one showing 4.6.

WHAT CHANGED

The Contact Sales page (changed this week, 109 to 120 words) opens with '4.6 rating'. Eleven other pages — including the homepage, the enterprise page, and the use-case pages — show '4.7' alongside 'Check our reviews on G2'. Since G2 ratings move over time, this most likely means the Contact Sales page was missed when the figure was last refreshed sitewide. Low impact on its own, but it sits on the page prospects use to start a sales conversation.

Video

Right rail: 'PRONUNCIATION' section replaced by 'Replacements'

Tutorial: Create Clips · <https://www.youtube.com/watch?v=8S9M01NwEpw>

ARTICLE SCREENSHOT

Right rail with PRONUNCIATION, RECENTLY USED, SEE ALL AVATARS, MY FAVORITES

LIVE UI

right-hand rail showing 'Project' header, 'Replacements' section with Personal/Team toggles, 'Open libraries' button and

SUGGESTED FIX

The right rail no longer contains the voice picker or the phonetic pronunciation form. The current rail is titled 'Project > Replacements' with Personal/Team toggles, an 'Open libraries' button, and a 'New replacement' affordance. The pronunciation concept evolved into the broader Replacements + Libraries feature.

WHAT CHANGED

Current-app capture of the editor right rail.

A recreation plan for this video is available in Drift Monitor.

How to read it

WellSaid Drift Monitor compares your published content with your sources of truth on every scan. When they disagree it raises an alert with the evidence, where it appears and a suggested fix. Severity reflects how likely the gap is to mislead a learner or customer: critical first, then warning, then info.

Findings are advisory. Please verify content before making changes.
