DR-0097 **Critical** Text Team Management and Setup

The SSO article's OpenID Connect section now lists the SAML settings by mistake — the OIDC values IT needs are gone

Single Sign-On Documentation · help.wellsaid.io/.../39177011880979-Single-Sign-On-Documentation

Entity ID	urn:auth0:wellsaidlabs:XXX-saml
ACS URL	https://auth.wellsaidlabs.com/login/callback?connection=XXX-saml
SP initiated	true
SP certificate	https://auth.wellsaidlabs.com/pem
Attributes	firstname, lastname, email — must be included in the SAML response

XXX is replaced with the values assigned to your team.

Open ID Connect (OIDC)

Values your technical contact provides:

Value	Example
Sign-in URL	https://samlp.example.com/login
Sign-out URL (if enabled)	https://samlp.example.com/logout
X.509 signing certificate	—

Values WellSaid provides:

HELP ARTICLE

CURRENT
Open ID Connect (OIDC)

SUGGESTED FIX

Restore the OpenID Connect values that were replaced with duplicated SAML values during the July 31 rewrite. Under "Open ID Connect (OIDC)", the values your technical contact provides are Issuer URL, Client ID, and Provider domain (example: wellsaid.io) — not a SAML sign-in URL or an X.509 signing certificate. The values WellSaid provides are Redirect URL: https://auth.wellsaidlabs.com/login/callback, Initiative login URL: https://studio.wellsaidlabs.com/auth/sso?connection=XXX, and Logout URL: https://auth.wellsaidlabs.com/logout — not an Entity ID, ACS URL, SP certificate, or SAML attribute list.

VOICED FIX

OpenID Connect, or OIDC. Your technical contact provides three values: the Issuer URL, the Client ID, and your Provider domain, for example, wellsaid.io. WellSaid provides three values in return: the Redirect URL, the Initiative login URL, and the Logout URL. Each address is listed in this section. An OpenID Connect setup doesn't use a SAML sign-in URL, an X.509 signing certificate, an Entity ID, an ACS URL, or a SAML attribute list.

[Listen \(0:34\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The "Open ID Connect (OIDC)" section is now a word-for-word copy of the SAML section directly above it: same sign-in URL example (<https://samlp.example.com/login>), same X.509 signing certificate row, same Entity ID (`urn:auth0:wellsaidlabs:XXX-saml`), same ACS URL ending in `-saml`, and the same line "firstname, lastname, email — must be included in the SAML response." An Enterprise IT team setting up OIDC has nothing correct to work from, and every value on the page points them at a SAML connection instead. The four OIDC-specific values (Issuer URL, Client ID, Redirect URL, Initiative login URL) were published on this page as recently as the July 26 scan and disappeared in the July 31 rewrite.

Plans & Subscription

The new plans article says self-serve customers can downgrade in Studio, but two other billing articles say Studio has no downgrade option

Understanding Self-Serve and Managed Plans · help.wellsaid.io/.../55524065567123-Understanding-Self-Serve-and-Managed-Plans

The screenshot shows a help article titled "Self-serve plans". On the left is a sidebar with navigation links: "Connect to Tools", "Support", and "Articles in this section". The "Articles in this section" list includes: "Understanding Self-Serve and Managed Plans", "Choosing the Right WellSaid Studio Plan", "Does WellSaid Offer Enterprise Pricing?", "Managing Your Studio Subscription", "Managing Your Business Subscription", "Upgrading Your Studio Subscription", "Canceling Your Studio Subscription", and "Understanding Your...". The main content area has a sub-header "Self-serve plans" and a paragraph: "Self-serve plans are purchased and managed directly in WellSaid Studio. Self-serve plans include:". This is followed by a bulleted list: "Free/Trial", "Starter", "Pro", and "Business". A red dashed box highlights a paragraph: "With a self-serve account, you can manage your subscription and billing directly in Studio, including upgrading, downgrading, and canceling your subscription." Below this is another paragraph: "Self-serve plans are a good fit if you:" followed by a bulleted list: "Want to purchase and manage your subscription directly", "Prefer to pay by credit card", "Don't need a negotiated contract", and "Want to manage your subscription without an account representative". At the bottom, it says: "Support is available based on your plan. Starter and Pro include email support, while Business includes live chat and email support." The article is categorized as a "HELP ARTICLE".

CURRENT

With a self-serve account, you can manage your subscription and billing directly in Studio, including upgrading, downgrading, and canceling your subscription.

SUGGESTED FIX

Match the existing billing articles, for example: "With a self-serve account, you can manage your subscription and billing directly in Studio, including upgrading and canceling. To move to a lower-cost plan, cancel your current subscription and re-subscribe to the lower plan using the same email address." Link to Managing Your Studio Subscription for the steps.

VOICED FIX

With a self-serve account, you can manage your subscription and billing directly in Studio, including upgrading and canceling. To move to a lower-cost plan, cancel your current subscription and re-subscribe to the lower plan using the same email address. For the steps, see Managing Your Studio Subscription.

[Listen \(0:17\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

This article, published September 17 and updated September 29, says self-serve customers can downgrade directly in Studio. Upgrading Your Studio Subscription says "WellSaid doesn't offer self-serve downgrades," and Managing Your Studio Subscription says "Studio doesn't support switching directly to a lower-cost plan." Both tell customers to cancel and re-subscribe instead. A customer who follows the new article will look for a downgrade option that isn't there.

Video

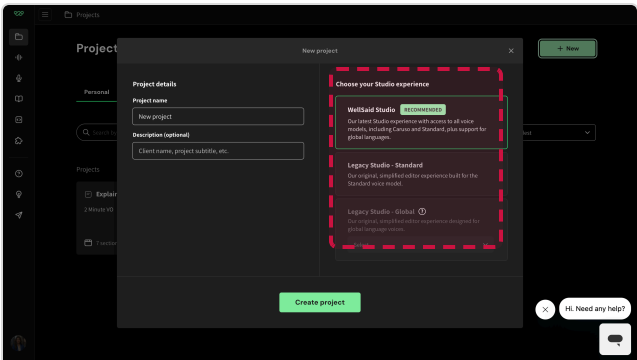

'Current / Future BETA' version dropdown has been restructured

Tutorial: Create Clips · <https://www.youtube.com/watch?v=8S9M01NwEpw>

ARTICLE SCREENSHOT

'Current' version dropdown in Create a new project modal

LIVE UI

right-side 'Choose your Studio experience' panel in the New project modal containing the three radio cards (WellSaid Stu

SUGGESTED FIX

The narrator says 'select the current version of Studio' but the Current/Future BETA dropdown was replaced by three radio cards under 'Choose your Studio experience' — 'WellSaid Studio (recommended)', 'Legacy Studio - Standard', 'Legacy Studio - Global'. The 'current' option was demoted to 'Legacy Studio - Standard' (which is what this tutorial actually demonstrates). A viewer following along will not find a 'current version' selector.

VOICED NARRATION LINE

Under Choose your Studio experience, select Legacy Studio - Standard, the version this video shows.

[Listen \(0:06\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

Current-app capture: 'New project' modal shows three radio cards -- 'WellSaid Studio' (RECOMMENDED), 'Legacy Studio - Standard', 'Legacy Studio - Global' (with additional language dropdown).

A recreation plan for this video is available in Drift Monitor.

VIDEO <https://www.youtube.com/watch?v=8S9M01NwEpw> at 0:11

DR-0069

Warning

Video

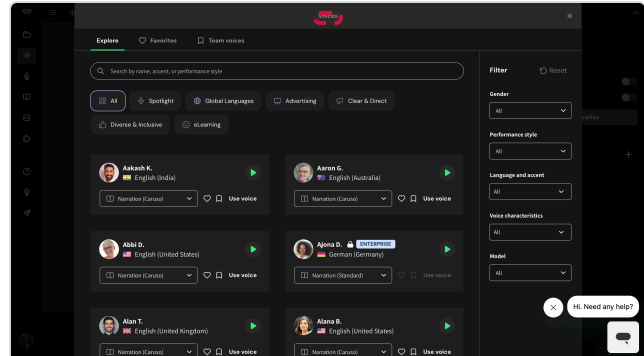

Narration says 'voice library' -- panel renamed to 'Voices'

Tutorial: Create Clips · <https://www.youtube.com/watch?v=8S9M01NwEpw>

ARTICLE SCREENSHOT

Entire modal panel (formerly 'voice library', now titled 'Voices'); bbox wraps the dialog from top header down through t

LIVE UI

modal title 'Voices' at top — the panel formerly referred to as the 'voice library' is now titled Voices

SUGGESTED FIX

Re-record or caption: '...from our Voices panel...'. The voice selector dialog is now titled 'Voices' (confirmed in current-app capture).

VOICED NARRATION LINE

Select the voice from our Voices panel.

Condition: use this line only if the narration sentence that says 'voice library' is the same sentence DR-0068 replaces. Then one take serves both. Changed status from voiced to proposed. DR-0069's own fix gives only the fragment '...from our Voices panel...', and current is empty, so the rest of the sentence isn't stated anywhere for this id. The words 'Select the voice' come from DR-0068. DR-0068's quoted line contains this exact fragment, which suggests one shared sentence, but the data doesn't confirm it. Also removed the writer's quote 'voice avatar from our voice library'. That phrase appears nowhere in current, fix or evidence for either alert.

[Listen \(0:02\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

Corroborated by an existing WellSaid finding: 'Article says Voice Library — the dialog is now titled Voices'.

A recreation plan for this video is available in Drift Monitor.

VIDEO <https://www.youtube.com/watch?v=8S9M01NwEpw> at 0:17

What's New

Legacy-migration preview article still uses future tense for the June 1, 2026 migration that has already gone live, and promises a guide "in June" that is already published

Migrating Legacy Projects to WellSaid Studio · help.wellsaid.io/.../51253958068755-Migrating-Legacy-Projects-to-WellSaid-Studio

CURRENT

Starting June 1, 2026, you'll be able to migrate legacy projects into WellSaid Studio — one at a time, at your own pace.

SUGGESTED FIX

The stated date has already passed. This older preview article (created 2026-04-29) should be rewritten in present/as-of framing (e.g. 'You can now migrate your legacy projects into WellSaid Studio — one at a time, at your own pace.') and the line 'We'll be sharing a complete migration guide in June.' should be replaced with a link to the now-published guide. Consider whether this preview article is still needed at all now that the full guide and FAQs exist, or redirect it.

VOICED FIX

You can now migrate your legacy projects into WellSaid Studio — one at a time, at your own pace.

[Listen \(0:05\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

Article 51253958068755 (last updated 2026-09-08) still reads 'Starting June 1, 2026, you'll be able to migrate legacy projects', 'Migration is not automatic. Starting in June, you'll be able to migrate projects one at a time', and 'We'll be sharing a complete migration guide in June.' The stated date has already passed. Migration is already live: the companion guide 51751205121299 (published 2026-05-15) uses present tense ('you can migrate your legacy projects') and the dated timeline table lists 'June 1, 2026 — Migration opens.' Readers are told migration is a future capability and that a complete guide is still forthcoming, when both already exist.

Enterprise security

HELP ARTICLE

CURRENT

We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.

SUGGESTED FIX

The stated date has already passed. Either update the date to the current/next target year, restate as completed ('As of 2025, we meet WCAG 2.1...'), or remove the forward-looking deadline. A prospect or procurement/legal reviewer reading an overdue compliance commitment on the security page may read it as an unmet obligation.

VOICED FIX

Waiting on a decision before it is voiced. Open question: has WellSaid met WCAG 2.1 yet, and if not, what is the new target year? The fix offers three options. It leads with moving the date to the current or next target year, but no year is given. The second option ('As of 2025, we meet WCAG 2.1...') claims compliance, and the fix gives it only as an alternative, cut off with '...'. The evidence says the page still treats the goal as in progress. The third option is to remove the deadline. That version would need only words from the current text ('We are committed to meet WCAG 2.1 and other national standards.'), but the fix doesn't lead with it. Someone has to choose before this is voiced. checked: ok

WHAT CHANGED

This page (<https://www.wellsaid.io/features/features-security>; the prior /features/security page was removed). Its Accessibility section reads 'We are committed to meet WCAG 2.1 and other national standards, working towards compliance in these areas by 2025.' The stated date has already passed. The rest of the section is forward-looking ('working towards'), so the page implies the WCAG 2.1 goal is still in progress past its own deadline. Not present in the carried-forward finding set.

ARTICLE <https://www.wellsaid.io/features/features-security> **FIRST SEEN** 2026-06-21 — also in 15 prior scans

Marketing Site

The size of the voice library is still advertised three ways across the site (120+, 240+ and 280+)

Advertising · <https://www.wellsaid.io/solutions/advertising>

CURRENT

Access to over 120+ voices, with a variety of accents, languages and tones.

SUGGESTED FIX

Settle on one voice-library total and use it on every page. Most pages, the homepage included, say 280+. If that's the current number, change this line to "Access to 280+ voices, with a variety of accents, languages and tones." and make the same edit on /features/ai-voices ("240+ realistic AI voices", used twice) and in the two blog posts that say WellSaid "offers more than 120 voices" and "more than 120 AI voices".

VOICED FIX

Access to 280+ voices, with a variety of accents, languages and tones.

Condition: only if 280+ is the current voice-library total. The fix says 'If that's the current number', and first asks to settle on one total. The same total also has to go on the AI voices feature page (240+) and in the two blog posts (120).

The proposed copy is used word for word, including '280+', because paste-ready copy wins (rule 1). checked: ok

[Listen \(0:05\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The Advertising page says "Access to over 120+ voices", /features/ai-voices (<https://www.wellsaid.io/features/ai-voices>) says 240+ twice, and the homepage, the Marketing page and every use-case page say 280+. Two blog posts still say "more than 120". The Marketing page was fixed this week and now says 280+ in every place.

Articles in this section

▶ Requesting an API Key for WellSaid

▶ Viewing API Character Usage

1. Sign up for a free account or log in to your WellSaid account.
2. From the left navigation menu, locate and click on **API**.
3. Within the WellSaid API section, select **Request API Key**.
4. Complete the provided form with a short description of how you plan to use our API in your product.
5. Click **Submit Request**.
6. Your API key will generate and appear in the **API Plan** section. Copy your new API key!

What to Expect Next

- Enjoy a 14-day trial period to explore and test our API capabilities.
- The trial includes up to 50 calls and access to all our voice avatars.
- Our dedicated team will collaborate with you during the trial to guide you through the next steps and build the right plan for your business.
- Want to learn more? [Contact us](#) today.

Explore our API

- Explore our [API documentation](#) for a deeper understanding of our API capabilities.
- Test out features using our open playground.

And that's it! Following these steps will set you on the path to obtaining your API key and unlocking the full potential of WellSaid in your products. If you have any issues or questions, please contact our support team.

HELP ARTICLE

CURRENT

Enjoy a 14-day trial period to explore and test our API capabilities.

SUGGESTED FIX

Confirm the correct API trial length, then update this article or the API landing page (<https://www.wellsaid.io/text-to-speech-api>) to match. The Release Notes also mention a "14-day trial", so update them too if 7 days is correct.

VOICED FIX

Waiting on a decision before it is voiced. Open question: is the API free trial 7 days or 14 days? This article and the Release Notes say 14 days, and the public API page says 7. The fix says to confirm the correct length first, so no guess is voiced. checked: ok

WHAT CHANGED

This Help Center article (updated June 29) says 'Enjoy a 14-day trial period to explore and test our API capabilities.' The public API page at [wellsaid.io/text-to-speech-api](https://www.wellsaid.io/text-to-speech-api) says 'Signing up for an API trial is free and easy. You'll have 7 days to try out all of our features.' Both describe the same API trial, so a developer comparing the two can't tell whether it's 7 or 14 days.

Support

Support article promises chat replies “within 1 hour”, but the pricing page says Business chat is a 4-hour SLA (only Enterprise/Priority is 1 hour)

Finding WellSaid Support Options · help.wellsaid.io/.../39078756560915-Finding-WellSaid-Support-Options

The WellSaid Help Center is a self-serve knowledge base with guides, how-tos, and answers to commonly asked questions — available anytime, no login required.

Onboarding support

Business and Enterprise accounts may include an onboarding kickoff call to help your team get started with WellSaid Studio best practices.

Response and resolution times

Chat: Within 1 hour during open hours.

Email: Usually within 1 business day.

If an issue can't be resolved during a chat or email conversation, your support agent will keep you updated on expected resolution times.

Still need help? Email us at support@wellsaidlabs.com or use the **chat icon** in WellSaid Studio during open hours.

FAQs

Q: Is live chat available on all plans?

A: No. Live chat is available for Business and Enterprise customers only. All customers can reach Support via email.

HELP ARTICLE

CURRENT

Chat: Within 1 hour during open hours.

SUGGESTED FIX

Align the chat response time between the Help Center and the pricing page. The pricing page distinguishes Business "Live Chat (4 hour SLA during business hours)" from Enterprise "Priority Chat (1 hour SLA during business hours)", but this support article gives a single blanket "within 1 hour" for all chat customers. Either scope the 1-hour figure to Priority/Enterprise chat or update the pricing SLA to match.

VOICED FIX

Chat replies come within 1 hour during open hours for Enterprise Priority Chat, and within 4 hours during open hours for Business Live Chat.

Condition: only if the pricing page's chat SLAs stand: Business Live Chat 4 hours, Enterprise Priority Chat 1 hour. If the pricing SLA is changed to match this article instead, the current line stays and this audio isn't used. Status changed from voiced to proposed. The fix gives two options ('Either scope the 1-hour figure to Priority/Enterprise chat or update the pricing SLA to match') and no one has chosen yet. The script voices the first option, so it depends on that choice. The script opens with "Chat replies come" instead of the bare "Chat:" label, which the voice swallowed. Every figure and label comes from the pricing-page SLAs quoted in the fix, and it keeps the article's 'during open hours' wording.

[Listen \(0:07\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

This Help Center article, edited on 2026-09-08, lists chat as available for Business and Enterprise customers and, under "Response and resolution times", states "Chat: Within 1 hour during open hours." The pricing page (<https://www.wellsaid.io/ai-voice-pricing>) instead promises Business "Email (1 business day SLA) and Live Chat (4 hour SLA during business hours)" and reserves the 1-hour figure for Enterprise: "Priority Chat (1 hour SLA during business hours)". A Business customer reading the support article expects a 1-hour chat reply that the pricing SLA doesn't guarantee.

ARTICLE [help.wellsaid.io/.../39078756560915-Finding-WellSaid-Support-Options](https://www.wellsaid.io/.../39078756560915-Finding-WellSaid-Support-Options)

SOURCE <https://www.wellsaid.io/ai-voice-pricing> **FIRST SEEN** 2026-07-12 — also in 12 prior scans Model confidence: 0.72

The number of supported languages is given four different ways across the site — 17, 18, 30+ and 50+

CURRENT
Deliver the same message clearly across 17 languages

SUGGESTED FIX
Confirm the current language total and use it everywhere, or say plainly what is being counted. This page promises 17 languages, but the "Supported languages & accents" table lower on this same page lists 18 (Arabic, Cantonese, Czech, Danish, Dutch, English, French, German, Italian, Japanese, Korean, Mandarin, Persian, Polish, Portuguese, Spanish, Swedish, Turkish). /industries/voice-ai-marketing says "support for 30+ languages", the Help Center's List of WellSaid Voices says "Global Voices in 30+ languages", and the homepage, corporate-training and social-media-content pages say 50+ — a figure that appears to include regional accents. Paste-ready for this page: "Deliver the same message clearly across 18 languages".

VOICED FIX

Deliver the same message clearly across 18 languages

Condition: only if 18 is the language total WellSaid confirms. That is the count in this page's own Supported languages & accents table; other pages say 30+ or 50+. Status changed from voiced to proposed. The fix leads with 'Confirm the current language total and use it everywhere, or say plainly what is being counted', so the paste-ready copy depends on that confirmation. This also matches the rules' needs_decision example, 'use one language total'. It is proposed rather than needs_decision because the fix does supply paste-ready copy, so nothing is guessed. The script is unchanged: the fix's paste-ready text word for word, with no period added. The voice-count half of this tile is tracked in a separate alert.

[Listen \(0:03\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

This page was updated this week. Its "Multilingual employee comms" tile reads "Deliver the same message clearly across 17 languages and 280+ AI voices without rebuilding anything", while the "Supported languages & accents" table on the same page lists 18 languages. Two other figures are in circulation: 30+ (on /industries/voice-ai-marketing and in the Help Center's List of WellSaid Voices) and 50+ ("Access 50+ languages including Spanish, French, Japanese, Korean, and more" on the homepage, "50+ languages & accents" on corporate-training and social-media-content). A communications lead checking whether their regional languages are covered gets 17, 18, 30+ or 50+ depending on the page. The voice-count half of the same sentence is covered separately by 'marketing-voice-count-inconsistency-120-240-280'.

Getting Started

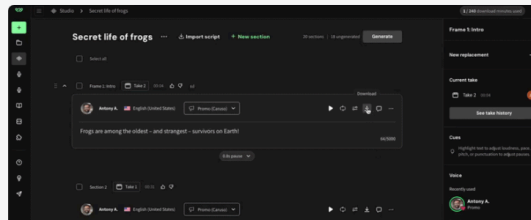

The pricing page dropped WAV and OGG downloads from the Pro plan in late July, but the getting-started guide still tells everyone to pick .mp3, .wav, or .ogg

Getting Started with WellSaid Studio · help.wellsaid.io/.../39187892094099-Getting-Started-with-WellSaid-Studio

Downloading your audio

1. Click the download icon on a section.
2. Choose a file format: .mp3, .wav, or .ogg.
3. Enter a file name, and optionally check off caption files (.srt, .vtt, .txt) to include.
4. Click on Download.

HELP ARTICLE

CURRENT

Choose a file format: .mp3, .wav, or .ogg.

SUGGESTED FIX

Add the plan condition to this step so it matches the pricing page, using the wording already used in Downloading Sections and Projects. Paste-ready: "Choose a file format: .mp3, .wav, or .ogg. MP3 is available on all plans. OGG and WAV require a Business or Enterprise plan." The same change is needed in Updating Global Download Settings (help.wellsaid.io/.../39078836537619-Updating-Global-Download-Settings), which tells readers to "Choose your preferred file format from the list (e.g., MP3, WAV, OGG.)" with no plan condition. If Pro is in fact meant to keep WAV and OGG, the pricing page's Export formats row is the row to correct instead.

VOICED FIX

Choose a file format: MP3, WAV, or OGG. MP3 is available on all plans. OGG and WAV require a Business or Enterprise plan.

Condition: use this only if the Pro plan really has lost WAV and OGG, as the pricing page now shows. The fix says that if Pro is meant to keep WAV and OGG, the pricing page's Export formats row gets corrected instead of this step. The script uses the fix's paste-ready copy word for word, except that '.mp3, .wav, or .ogg' becomes MP3, WAV, or OGG so it reads aloud cleanly (rule 4). The evidence backs the copy: the pricing page's Export formats row and Downloading Sections and Projects both say it. The same edit is also needed in Updating Global Download Settings, a separate article that is not voiced here. Checker: changed status from voiced to proposed. The writer treated the fix's fallback as an option it could skip. In fact the fallback depends on an unsettled fact (whether Pro is meant to keep WAV and OGG), which makes the copy conditional.

[Listen \(0:12\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The pricing page's Export formats row now reads "MP3MP3MP3, TXTMP3, WAV, OGG, TXTMP3, WAV, OGG, TXT" across Trial, Starter, Pro, Business and Enterprise — the Pro column changed from "MP3, WAV, OGG, TXT" to "MP3, TXT" after the July 26 scan. This guide, rewritten on 2026-07-25, still says "Choose a file format: .mp3, .wav, or .ogg." with no plan condition, and Downloading Sections and Projects says "MP3 is available on all plans. OGG and WAV require a Business or Enterprise plan." A Pro subscriber following the getting-started steps will look for a .wav option that their plan no longer offers.

Voices

The new intro promises every voice is tagged with a speaking style, but more than half the list is tagged "(Partner)" — a voice model, not a style

List of WellSaid Voices · help.wellsaid.io/.../39112914360467-List-of-WellSaid-Voices

Help Center > Using Studio > Voices

List of WellSaid Voices

Article overview

Browse every voice available in Studio, by language and accent.

This list covers all English voices plus Global Voices in 30+ languages, each tagged with the style it supports — Narration, Conversational, Promo, or Character. Use it to see what's available before you go looking in Studio, then preview and pick a voice from the Voices library in your project.

English Voices

- Alana B. (Narration, Conversational)
- Antony A. (Narration, Conversational, Promo)
- Ava M. (Narration, Conversational, Promo)
- Bella B. (Narration, Conversational, Promo)
- Cameron S. (Narration)
- Chase J. (Narration)

HELP ARTICLE

CURRENT

each tagged with the style it supports — Narration, Conversational, Promo, or Character

SUGGESTED FIX

Either tag the Global Voices with their actual speaking styles, or change the intro so it stops promising something the list doesn't deliver. Paste-ready alternative: "This list covers all English voices plus Global Voices, tagged with the speaking style each one supports — Narration, Conversational, Promo, or Character. Global Voices supplied through our partner network are tagged Partner; browse them in the Voices library to hear the styles available." It would also help to add a one-line note explaining what Partner means, since Creating Audio at Different Sample Rates treats Partner as a voice model alongside Standard and Caruso.

VOICED FIX

This list covers all English voices plus Global Voices, tagged with the speaking style each one supports — Narration, Conversational, Promo, or Character. Global Voices supplied through our partner network are tagged Partner; browse them in the Voices library to hear the styles available.

[Listen \(0:17\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The intro paragraph added to this article in its August 7 update says the list covers voices "each tagged with the style it supports — Narration, Conversational, Promo, or Character". Of the 205 voices listed, 109 are tagged "(Partner)" instead — every Arabic, Chinese, Czech, Danish, Dutch, Italian, Japanese, Korean, Persian, Polish, Portuguese, Swedish and Turkish voice, plus most Spanish, French and German ones. Partner is a voice model, not a style: [Creating Audio at Different Sample Rates](#) says "Standard and Partner voices always render at 24 kHz", and [Exploring Languages, Accents, and Styles](#) says "Voices are organized into four speaking styles" with no Partner among them. Someone looking for a Conversational Spanish voice can't tell from this list which Spanish voices offer one.

What's New

Customers running low on minutes are told add-on packs are still coming and to contact Support — but add-ons shipped in July and can be bought self-serve

Understanding June 2026 Pricing and Plan Changes · help.wellsaid.io/.../52476451642003-Understanding-June-2026-Pricing-and-Plan-Changes

- ▶ Using Audition to Find a Voice
- ▶ Understanding June 2026 Pricing and Plan Changes
- ▶ Adding More Minutes to Your Plan
- ▶ Previewing New Voice Models
- ▶ Migrating Legacy Projects to WellSaid Studio
- ▶ Generating Audio for All Sections

includes a set number of audio minutes you can download each month. For example, a 5-minute clip counts as 3 downloaded minutes toward your total.

All paid plans continue to include unlimited generation — these do not count against your downloaded minutes.

I'm on an annual plan. When do my downloaded minutes reset?

Annual plan customers receive their full yearly allocation upfront as a single bucket — for example, 180 minutes/month means 2,160 minutes available immediately for the year.

I'm running low on downloaded minutes. What are my options?

If you're on an annual plan, you can renew early to refresh your allocation. If you're on a monthly plan, switching to annual gives you access to the full year's minutes up front. Add-on minute packs are also planned for a future release. Contact [Support](#) if you need additional minutes in the interim.

I'm on a Business or Enterprise plan, and I see downloads, not downloaded minutes. Is something wrong?

Nothing is wrong. Existing Business and Enterprise customers remain on downloads for the duration of their current contracts. Downloaded minutes apply to new Business and Enterprise customers. If new users join your account, they'll be onboarded to downloads to match your existing setup.

Changing plans

HELP ARTICLE

CURRENT

Add-on minute packs are also planned for a future release.

SUGGESTED FIX

Replace that line with the option customers can actually use today. Paste-ready: "You can also buy an add-on to top up your minutes without upgrading — see [Adding More Minutes to Your Plan](#)." and link help.wellsaid.io/.../53255263259283-Adding-More-Minutes-to-Your-Plan. Drop the "Contact Support if you need additional minutes in the interim" sentence, since that route is no longer needed. While in this article, the opening line "WellSaid is updating its individual plans and how usage is measured in June 2026" also reads as an upcoming change now that June has passed — reword it to "As of June 2026, WellSaid updated its individual plans...".

VOICED FIX

You can also buy an add-on to top up your minutes without upgrading — see [Adding More Minutes to Your Plan](#).

[Listen \(0:05\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

This article was last updated on September 8 and still answers "I'm running low on downloaded minutes" with "Add-on minute packs are also planned for a future release. Contact Support if you need additional minutes in the interim." Add-ons have been live for a month: the July 2026 Release Notes entry reads "Add-ons let you add extra minutes to your current plan – active the moment you buy", the article [Adding More Minutes to Your Plan](#) walks through buying one from Account Settings, Understanding Your Download Limit already points readers there, and every plan card on the pricing page now says "Extra minutes available". Customers who hit their limit are being sent to Support for something they can buy themselves in three clicks.

Team Management and Setup

The admin onboarding guide still says the heart icon adds a voice to Team Voices — it's the bookmark icon, and the heart saves to personal Favorites instead

Getting Started for Team Admins · help.wellsaid.io/.../39177116852243-Getting-Started-for-Team-Admins

Articles in this section

- ▶ Getting Started for Team Admins
- ▶ Managing Workspaces
- ▶ Adding and Removing a Team Member
- ▶ Building Your Team Voices List
- ▶ Single Sign-On Documentation
- ▶ Insights Dashboard for Enterprise

team member.

5. Click **Invite**, and your team member will receive an invitation email in their inbox.

Build your list of approved team voices

Ensure every audio output reflects your brand by creating a curated list of approved voices for your team. This feature streamlines the voice selection process for your team across projects, saving time and ensuring a consistent brand experience across all touchpoints.

1. In Studio, navigate to the left menu to open the Voices page.
2. Choose a voice and style you wish to favorite from the Explore or All tabs.
3. Click the **heart icon** on the voice card to add it to Team Voices.
4. Your newly saved favorite voice will now appear in the Team Voices tab on the Voices page.

Create Workspaces for smaller groups

Enterprise customers can further segment team workflow into smaller groups by creating a workspace. Workspaces allow you to invite team members to a shared workspace where only invited members will have access to projects.

1. In Studio, navigate to your **Projects** page.
2. Click **New** and choose **Workspace**.
3. Select members of your team to add to the workspace

HELP ARTICLE

CURRENT

Click the heart icon on the voice card to add it to Team Voices.

SUGGESTED FIX

Change this step to "Click the bookmark icon on the voice card to add it to Team Voices," matching Building Your Team Voices List. While you're in this step, also drop "or All tabs" — every rewritten voice article now sends readers to the Explore tab only.

VOICED FIX

Click the bookmark icon on the voice card to add it to Team Voices.

[Listen \(0:03\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

Building Your Team Voices List, updated on August 7, says "Click the bookmark icon on the voice card to add it to Team Voices" in both of its paths, and Favoriting a Voice spells out the difference: "Click the heart icon on the voice card to add it to Favorites" followed by "Note: Each voice card also has a bookmark icon next to the heart. That one adds the voice to Team Voices, a shared list for your team — it's separate from your personal Favorites." A new admin following this onboarding guide clicks the heart, and the voice lands in their own Favorites rather than the shared team list they were setting up. This page also still says "Choose a voice and style you wish to favorite from the Explore or All tabs" — the All tab was dropped from both of the rewritten voice articles.

Voice Delivery & Pacing

The Emotional Presets FAQ answers a different question than the one it asks — and reverses its earlier answer without saying so

Using Emotional Presets · help.wellsaid.io/.../39047202485779-Using-Emotional-Presets

The preset is removed, and the voice returns to its default behavior.

Tip: Applying a preset to several sections at once? See [Applying Bulk Cues to Multiple Sections](#). Want more precise control over loudness, pace, pitch, or pause instead? See [Using Voice Cues](#).

FAQs

Q: Can I apply more than one preset to a section?

A: Yes. You can apply presets across multiple sections.

Related to
voice cues

Was this article helpful?

☐ Yes ☐ No

0 out of 0 found this helpful

HELP ARTICLE

CURRENT

A: Yes. You can apply presets across multiple sections.

SUGGESTED FIX

Either restore an answer that addresses the question asked — "No. Only one Emotional Preset can be active per section at a time; applying a new preset replaces the previous one" — or change the question to "Can I apply a preset to more than one section?" so the "Yes" answer fits. Don't leave both mismatched.

VOICED FIX

Can I apply more than one preset to a section? No. Only one Emotional Preset can be active per section at a time; applying a new preset replaces the previous one.

[Listen \(0:10\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The question is "Can I apply more than one preset to a section?" but the answer talks about applying presets across multiple sections — a different thing. Read literally, it also contradicts the rest of the page: the Removing a preset steps describe a single Reset icon that returns the voice to its default, which only makes sense with one preset per section. Until the July 31 rewrite this FAQ answered "No. Only one Emotional Preset can be active per section at a time. Applying a new preset replaces the previous one."

Past Updates

The July 30 lock-out date has passed, but both migration articles still describe it as something that might happen

Migrating Your Legacy Projects to WellSaid Studio · help.wellsaid.io/.../51751205121299-Migrating-Your-Legacy-Projects-to-WellSaid-Studio

What happens if you don't migrate by July 30

If you don't migrate by July 30, your legacy projects become view-only. You can still open them and play back or download existing audio, but you won't be able to edit them or generate new audio.

Migration is still available after July 30 — just click **Get started** in the banner to convert at any time. WellSaid automatically migrates any remaining legacy projects at the end of 2026.

FAQs

Q: Can I migrate a project if I'm not the original creator?

A: Yes, as long as you have full project access. Project owners and workspace admins can migrate any project in the workspace.

HELP ARTICLE

CURRENT

If you don't migrate by July 30, your legacy projects become view-only.

SUGGESTED FIX

Switch both articles to past tense now that the date has passed — for example: "As of July 30, 2026, any legacy project that hadn't been migrated is now view-only. You can still open it, play back, and download existing audio, but you can't edit it or generate new audio until you convert it. Migration is still available — click Get started in the banner on any legacy project." On Legacy Studio Migration FAQs, the same change applies to "Do I have to migrate before July 30?" and "You can keep editing and rendering in legacy projects normally up until July 30."

VOICED FIX

As of July 30, 2026, any legacy project that hadn't been migrated is now view-only. You can still open it, play back, and download existing audio, but you can't edit it or generate new audio until you convert it. Migration is still available — click Get started in the banner on any legacy project.

[Listen \(0:19\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The July 30, 2026 transition date has passed. Both articles still read as advance notice: this one asks "What happens if you don't migrate by July 30," and Legacy Studio Migration FAQs says "You can keep editing and rendering in legacy projects normally up until July 30" and "If a project does become view-only on July 30." A customer opening a locked project today can't tell from either article whether the lock is expected or a fault. This is the same pattern as the existing finding on the June 1 migration launch article (51253958068755), but a different date on two different pages.

APPEARS ON 2 PAGES

Combining Sections calls 48 kHz "the highest supported sample rate" two lines after explaining what happens to 96 kHz files

Combining Sections · help.wellsaid.io/.../39404298753299-Combining-Sections

A: You can combine up to 32 audio files into a single file.

Q: Are there any restrictions when combining sections with different sample rates?

A: Files rendered at 96 kHz are limited by total file size. If the combined file is too large, you may receive an error message.

Q: What if I combine 96 kHz files with 24 or 48 kHz files?

A: The 96 kHz files will be downsampled in the combined output.

Q: How does Studio determine the final sample rate when combining 24 kHz and 48 kHz files?

A: The combined file uses 48 kHz, the highest supported sample rate.

Related to
[clips](#) | [files](#) | [combine](#) | [splice](#)

Was this article helpful?

Yes No

0 out of 0 found this helpful

HELP ARTICLE

CURRENT

A: The combined file uses 48 kHz, the highest supported sample rate.

SUGGESTED FIX

Trim the claim so it only describes the case being asked about: "The combined file uses 48 kHz — the higher of the two rates." WellSaid supports up to 96 kHz on Enterprise, so 48 kHz isn't the ceiling.

VOICED FIX

The combined file uses 48 kilohertz — the higher of the two rates.

[Listen \(0:04\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

Two FAQs above this one on the same page deal with 96 kHz files: "Files rendered at 96 kHz are limited by total file size" and "The 96 kHz files will be downsampled in the combined output." The pricing page lists Enterprise sample rates as "24 kHz, 48 kHz, 96 kHz." An Enterprise customer reading this FAQ could reasonably conclude 96 kHz isn't offered. This line carried over unchanged when the article was renamed from Using the Combine Tool on August 1.

Paid plans add more minutes, commercial rights, and advanced features.

Trial	Starter	Pro	Business
\$0/mo No credit card required	\$10/mo Get started with voiceover	\$33/mo More features and minutes	\$160/mo/user Collaborate and scale
Choose Free	Choose Starter	Choose Pro	Choose Business
✓ 3 min/mo downloads ✓ 10 min of generation ✓ 3 projects	✓ 240 min/yr downloads ✓ Unlimited generation ✓ 10 projects	✓ 2,160 min/yr downloads ✓ Unlimited generation ✓ Unlimited projects	✓ 2,880 min/yr per user ✓ Up to 5 seats ✓ Team workspace

[HELP ARTICLE](#)

CURRENT

Paid plans add more minutes, commercial rights, and advanced features.

SUGGESTED FIX

Remove "Commercial rights" from the Trial column of the plan comparison on this page so it matches the pricing page, which reads "3 download minutes per month (no commercial rights)". Keep it on Starter and above, where it appears as "Full commercial rights". While the plan grid is open, it also helps to settle on one name for this tier — this page calls it "Free plan", "Free" and "Trial" in three different places, and the pricing page calls it "Trial".

VOICED FIX

Paid plans add more minutes, commercial rights, and advanced features. Trial is \$0 a month, with no credit card required, and includes 3 download minutes per month, 10 minutes of generation, 3 projects, and caption files. Starter and above include full commercial rights.

[Listen \(0:17\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

This page went live this week. The sentence above the plan comparison says "Paid plans add more minutes, commercial rights, and advanced features" — but the comparison directly below lists the free tier as "Trial \$0/mo, No credit card required, 3 min/mo downloads, 10 min of generation, 3 projects, Commercial rights, Caption files". The pricing page describes the same tier as "3 download minutes per month (no commercial rights)". Every other row on the free column matches the pricing page (3 projects, 10 minutes of generation), so commercial rights is the one line out of step. Someone signing up for the free plan from this page could reasonably believe they can publish the audio commercially.

Articles in this section

▶ WellSaid Studio for Adobe Express

▶ WellSaid Voiceover for Adobe Premiere Pro

Article overview

Add professional voiceovers to your Adobe Express projects without leaving Adobe Express.

With a WellSaid Studio subscription, you can create voiceovers and drop them straight into your Adobe Express timeline — no exporting or switching tools required.

Before you get started

- You need an Adobe Express account and a WellSaid Studio account (you can create one during setup).
- You'll need a Starter plan or higher.

Installing the WellSaid Add-on

- In Adobe Express, click on **More** in the left sidebar.
- Select Add-ons.**
- Search** for "WellSaid Voiceover".
- Click** the result to open its details, then **click on Add.**
- Log in** to your WellSaid Studio account, or create a new one.

Creating a Clip in the Add-on

Get professional voiceovers of 300 characters or less, created without leaving Adobe

HELP ARTICLE

CURRENT

You'll need a Starter plan or higher.

SUGGESTED FIX

Change this prerequisite to "You'll need a Pro plan or higher." to match the pricing page, where Adobe Express integration first appears on the Pro card and the Adobe integrations row is blank for Trial and Starter. On Collaborator Role (<https://help.wellsaid.io/hc/en-us/articles/43167117143315-Collaborator-Role>), the line "Collaborator licenses are available as an add-on to Enterprise subscriptions" needs the same treatment — the pricing page lists "Collaborator seats" in the Business plan's feature list, so either add Business to the article or take Collaborator seats off the Business card.

VOICED FIX

You'll need a Pro plan or higher.

[Listen \(0:01\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

Both articles were rewritten on 2026-08-05/07 and both added a plan requirement that the pricing page contradicts. This article now opens with "You'll need a Starter plan or higher", but on wellsaid.io/ai-voice-pricing the Starter card lists no Adobe integration at all, the Pro card lists "Adobe Express integration", and the comparison table's Adobe integrations row reads "Adobe Express integration | Adobe Premiere Pro & Express integrations | Adobe Premiere Pro & Express integrations" across Pro, Business and Enterprise only. The new /free-ai-voice-generator page agrees, showing Adobe Express integration on Pro. Separately, Collaborator Role now leads with "Collaborator licenses are available as an add-on to Enterprise subscriptions", while the pricing page's Business card reads "Everything in Pro, plus: Purchase up to 5 seats, Team workspace, Collaborator seats, Live chat support". A Starter subscriber installs the Adobe add-on and finds it unavailable; a Business customer is told to buy Enterprise for something their plan already lists.

Collaboration and Permissions

The permissions article tells admins that view-only members can revoke anyone's access — including the project owner's

Managing Team Permissions on Projects · help.wellsaid.io/.../39112841273235-Managing-Team-Permissions-on-Projects

3. Choose from the following options:

- **Full Access:** Allows complete project control within the workspace, including sharing access, editing, and downloading. Use this option when team members need comprehensive control over the project.
- **Can View:** Enables viewing and listening to voiceovers without editing capabilities plus downloads. Ideal for team members who only need access to review projects.

4. Click **Save**, and your team member(s) will now have access.

Removing access to a Workspace

Anyone with Full or View Edit Access can remove a team member's access to a project entirely, including the project owner. Use this option when team members no longer require access to the project.

1. Navigate to the **Workspace** in WellSaid Studio.
2. Click on the **ellipses (...)** menu and select **Settings**.
3. Find the team member whose access you want to revoke.
4. Click the **drop-down menu** next to their name, then choose **Remove**.
5. Click **Save** to make the change.

teams | admin | permissions

HELP ARTICLE

CURRENT

Anyone with Full or View Edit Access can remove a team member's access to a project entirely, including the project owner.

SUGGESTED FIX

Name the permission levels the article itself defines, and limit removal to the one that allows it. Paste-ready: "Anyone with Full Access can remove a team member's access to a Workspace, including the project owner. Can View members can't change access for themselves or anyone else." The Removing access section higher up the page has the same problem — "Anyone with Full Edit Access can remove a team member's access" should read "Anyone with Full Access". Neither "Full Edit Access" nor "View Edit Access" is one of the three levels this article lists (Full Access, Can Edit, Can View).

VOICED FIX

Anyone with Full Access can remove a team member's access to a Workspace, including the project owner. Can View members can't change access for themselves or anyone else.

[Listen \(0:09\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

This article was rewritten on August 7. It defines Can View as "Enables viewing and listening to voiceovers without editing capabilities plus downloads. Ideal for team members who only need access to review projects" — then, two paragraphs later, tells readers that "Anyone with Full or View Edit Access can remove a team member's access to a project entirely, including the project owner." Read as written, a review-only member can lock the project owner out of their own work. It also invents two permission names the article never defines: the personal-file section says "Anyone with Full Edit Access", the Workspace section says "Full or View Edit Access", while the permission picker in both sections offers Full Access, Can Edit, and Can View. An admin setting up review access for stakeholders can't tell from this page what a Can View member is actually able to do.

What's New

The Release Notes link to the Studio announcement no longer opens — the article it points to was taken down during the Help Center rewrite

Release Notes · help.wellsaid.io/.../39720425068051-Release-Notes

New Features

Apply Cues Across Multiple Sections

Script editing just got faster and more efficient with **bulk cues**. Select multiple sections in your project and apply a cue from the sidebar to update them all at once. This makes it easy to apply pacing, pitch, loudness, or emotional presets across an entire script in seconds.

Studio Update: A Simpler Way to Create Audio

We've updated [WellSaid Studio](#) to make creating audio across models and languages easier and more flexible.

What's new

- One unified, **script-first experience** for all voice models
- No more choosing project types based on model or language
- Model selection now happens within the project, not at creation
- Support for importing scripts written in **non-Latin character sets**, including Chinese, Arabic, Korean, and more

What's staying the same

- Existing projects remain accessible and unchanged
- Legacy project types are still accessible

HELP ARTICLE

CURRENT

We've updated WellSaid Studio to make creating audio across models and languages easier and more flexible.

SUGGESTED FIX

Point this link somewhere that still exists. "WellSaid Studio" in this sentence links to article 48785974467731 ("Introducing the New WellSaid Studio"), which was taken down in early August — Getting Started with WellSaid Studio (help.wellsaid.io/.../39187892094099-Getting-Started-with-WellSaid-Studio) is the natural replacement, or remove the link and leave the text plain. Two other pointers left over from the same rewrite are worth fixing in the same pass: Adding Longer Pauses in Your Script closes with "See Control Pauses Between Sections and Continuous Playback for more", but that guide was split into Controlling Pauses Between Sections and a separate Using Continuous Playback; and Organizing Your Work with Projects links to Team Collaboration (article 39176886765075), which is no longer reachable to signed-out readers — worth confirming whether that was intentional.

VOICED FIX

We've updated WellSaid Studio to make creating audio across models and languages easier and more flexible.

[Listen \(0:05\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The "Studio Update: A Simpler Way to Create Audio" entry links the words "WellSaid Studio" to <https://help.wellsaid.io/hc/en-us/articles/48785974467731>. That article, "Introducing the New WellSaid Studio", is still absent from the Help Center; requesting it returns "RecordNotFound — Not found", while a live article requested the same way returns normally. Nine articles were removed from the Help Center in the Aug 5–7 rewrite, and this is the one that still has an inbound link from a page customers use to catch up on what changed.

Support

Articles in this section

- List of WellSaid Voices
- Exploring Languages, Accents, and Styles
- Auditioning Voices
- Favoriting a Voice
- Selecting a Voice

Article overview

Know what's in the voice library — and what your plan unlocks — before you start browsing voices.

WellSaid Studio offers voices across multiple languages, regional English accents, and speaking styles — including which plan tier gives you full language access.

Before you get started

- Enterprise plans include full access to Global (non-English) languages.
- Self-serve plans (Free through Business) include the full range of English voices — every accent and style listed below.
- An accent (like Mexican or Indian) is a regional variation on an English voice — not a different language. To get audio in Spanish, German, or another language, choose a voice listed under that language instead.

Language variety

Studio supports the following Global languages:

- Arabic
- Chinese (Cantonese)
- Chinese (Mandarin)
- Czech

HELP ARTICLE

CURRENT

Self-serve plans (Free through Business) include the full range of English voices

SUGGESTED FIX

Start this claim at the first paid tier, since that is where the pricing page grants it. Paste-ready: "Paid self-serve plans (Starter through Business) include the full range of English voices — every accent and style listed below. The free Trial plan is limited to a curated set of voices." It is also worth picking one name for the free tier: the pricing page calls it "Trial", and the new free-plan landing page calls it "Free plan", "Free" and "Trial" on a single screen.

VOICED FIX

Paid self-serve plans (Starter through Business) include the full range of English voices — every accent and style listed below. The free Trial plan is limited to a curated set of voices.

[Listen \(0:10\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

This paragraph was added to the article in its August 7 update. The pricing page describes the free tier as "3 download minutes per month (no commercial rights)" plus "Curated voice actors", and reserves "All English voices" for the Starter and Pro cards. So the one tier in the stated range that doesn't get the full English library is the one the sentence starts from. A prospect on the free plan reads this article, goes looking for a specific accent or style listed below it, and doesn't find it.

HELP ARTICLE

CURRENT

English(New Zealand)

SUGGESTED FIX

Rebuild the accent list from the Help Center's List of WellSaid Voices, which is the maintained inventory. Remove English (New Zealand) — there are no New Zealand voices in Studio — and add the two accents that are missing: English (Mexico) (Hannah A., Lorenzo D., Paula R.) and English (United Kingdom) (Alan T., Benedict M., Fiona H., Frankie P., Melissa V., Oliver S. and others). Separately, the voice card on /text-to-speech-api labels Issa B. as "English (NZ)"; every other page and the Help Center list Issa B. under English (South Africa), so that card should read "English (ZA)".

VOICED FIX

Waiting on a decision before it is voiced. Open question: what is the full accent list in 'Supported languages & accents' after it's rebuilt from the Help Center's List of WellSaid Voices? The plan settles only three changes: remove English (New Zealand), and add English (Mexico) and English (United Kingdom). The rest of the list isn't in current, fix or evidence, so the corrected list can't be voiced without looking it up. The candidate 'English (ZA)' is wrong for this alert: it's the separate fix for the Issa B. voice card on the text-to-speech API page, not this homepage list. Rejected. checked: ok

WHAT CHANGED

The "Supported languages & accents" list appears on fifteen marketing pages, including the homepage (open it with "View all languages", then the Accents tab), and every copy of it lists English (New Zealand). The Help Center's List of WellSaid Voices — which is organised by accent and names every voice — has no New Zealand section at all. The only New Zealand label anywhere on the site is a single voice card on /text-to-speech-api reading "Issa B. English (NZ)", and the homepage, /features/ai-voices, /ai-voice-use-cases/video-production and /free-ai-voice-generator all label that same voice "Issa B. English (ZA)", matching the Help Center's English (South Africa) section. In the other direction, the list omits English (Mexico) even though this page's own hero plays "Hannah A. English (MX)" and the Help Center has an English (Mexico) section with three voices, and it omits English (United Kingdom) despite UK voices being demonstrated on this page ("James B. English (UK)") and across the site. Someone shortlisting vendors for a New Zealand audience would choose WellSaid and find no voice to use, and someone who needs a UK or Mexican English voice may rule WellSaid out for lacking one it has.

August 2026

New Features

Generate Audio for All Sections

Rendering long scripts just got a lot faster — you can now **generate every section in your project** in one click instead of rendering section by section. Access it anytime with the **Generate All** button in Studio.

Audition: Find the Right Voice for Your Project

Not sure which voice fits your project? Describe it in your own words and **get a ranked, personalized set of voice matches** — complete with a preview in your own script. Head to the **Voices** page and select the **Audition** tab to try it out.

Preview Upcoming Voice Models

You can now test **Preview 13.2**, the latest addition to our upcoming voices models. To

HELP ARTICLE

CURRENT

Access it anytime with the Generate All button in Studio.

SUGGESTED FIX

Use the same button name as the how-to article: "Access it anytime with the Generate button in the top-right corner of Studio." If the button really is labelled Generate All in the product, then Generating Audio for All Sections (help.wellsaid.io/.../52473662638739-Generating-Audio-for-All-Sections) is the page to correct instead — it names the button three separate times as Generate. While you're editing this entry, "generate every section in your project in one click" is worth changing to "generate every remaining section in one click": the how-to article's FAQ says sections you've already generated are skipped, not re-run.

VOICED FIX

Access it anytime with the Generate button in the top-right corner of Studio.

Voiced the fix's lead, paste-ready option. Condition: this assumes the Studio button is labelled Generate. The fix says that if the product actually labels it Generate All, this sentence stays and the article Generating Audio for All Sections gets corrected instead. Also, the fix's suggested change from 'generate every section in your project in one click' to 'generate every remaining section in one click' is in a different sentence of this entry. That full sentence isn't in the plan, so it isn't voiced. checked: ok

[Listen \(0:04\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

The August 2026 release note says "Access it anytime with the Generate All button in Studio." The article it announces, Generating Audio for All Sections, calls the same control Generate every time it names it: "Click on Generate in the top-right corner of the Studio", "the counter next to the Generate button counts down as each section finishes", and "If the counter still shows sections left, click Generate again to retry them." That article's wording is unchanged this week, so the two names still disagree. Someone who reads the release note and then goes looking for a Generate All button won't find one under that name.

Marketing Site

The 4imprint customer card repeats MOTUL's quote, so Amy Gustafson of 4imprint is shown saying another customer's words

AI Voice Generator & Text to Speech for Marketing | WellSaid · <https://www.wellsaid.io/industries/voice-ai-marketing>

CURRENT

Compared to previous AI tools, WellSaid voices sound realistic.

SUGGESTED FIX

On the 4imprint card, replace the quote with Amy Gustafson's own words from the 4imprint case study: "WellSaid is a complete game changer. It's made creating e-learning materials much more efficient and effective." Make the same change in the matching testimonial row on the homepage (<https://www.wellsaid.io/>).

VOICED FIX

WellSaid is a complete game changer. It's made creating e-learning materials much more efficient and effective.

[Listen \(0:06\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

In the "Trusted by leading brands" row, the MOTUL card and the 4imprint card show the same quote, "Compared to previous AI tools, WellSaid voices sound realistic." On the 4imprint card it's credited to Amy Gustafson, but her quote in the 4imprint case study (www.wellsaid.io/.../how-4imprint-built-a-faster-training-with-wellsaid) is "WellSaid is a complete game changer...", and that's how the Corporate communications page quotes her too.

Marketing Site

The rewritten Marketing page promises unlimited downloads with no usage caps, but every plan now caps downloaded minutes (and Starter caps projects)

AI Voice Generator & Text to Speech for Marketing | WellSaid · <https://www.wellsaid.io/industries/voice-ai-marketing>

CURRENT

Unlimited retakes, downloads & projects

SUGGESTED FIX

Change the heading to match the current plans, for example: "Unlimited generation on every paid plan", with body copy such as "Generate and revise as often as you need; your plan sets how many minutes of finished audio you can download." Make the same change on the Healthcare page ("Unlimited generation, downloads & projects") and the Manufacturing page ("unlimited generation and downloads"), and change "Easily edit with unlimited retakes." on the Advertising page to "Easily edit with unlimited generation."

VOICED FIX

Unlimited generation on every paid plan. Generate and revise as often as you need; your plan sets how many minutes of finished audio you can download.

[Listen \(0:09\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration

WHAT CHANGED

Since the June 2026 plan changes, usage is measured in downloaded minutes: every plan, Enterprise included, comes with a set number of download minutes (see <https://www.wellsaid.io/ai-voice-pricing>), and Starter is limited to 10 projects. The Help Center article [help.wellsaid.io/.../52476451642003-Understanding-June-2026-Pricing-and-Plan-Changes](https://www.wellsaid.io/help/52476451642003-Understanding-June-2026-Pricing-and-Plan-Changes) says "Your plan includes a set number of audio minutes you can download each month." This week's rewrite of the Marketing page also brought back the old "retakes" wording, which the rest of the site now calls "generation". The page also says "without usage caps or production limits."

Video

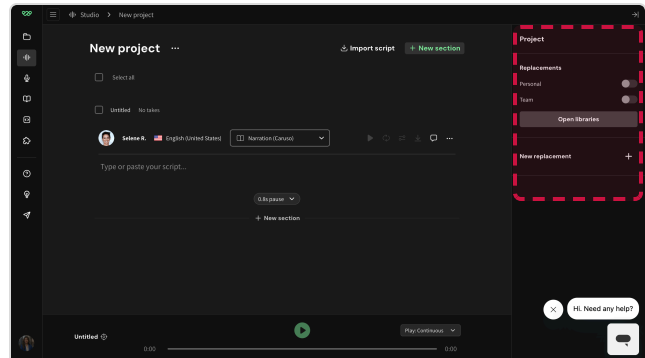

Right rail: 'PRONUNCIATION' section replaced by 'Replacements'

Tutorial: Create Clips · <https://www.youtube.com/watch?v=8S9M01NwEpw>

ARTICLE SCREENSHOT

Right rail with PRONUNCIATION, RECENTLY USED, SEE ALL AVATARS, MY FAVORITES

LIVE UI

right-hand rail showing 'Project' header, 'Replacements' section with Personal/Team toggles, 'Open libraries' button and

SUGGESTED FIX

In the new Studio, the right rail no longer has the phonetic pronunciation form (Legacy Studio - Standard still shows a Voices section there). The current rail is titled 'Project > Replacements' with Personal/Team toggles, an 'Open libraries' button, and a 'New replacement' affordance. The pronunciation concept evolved into the broader Replacements + Libraries feature.

VOICED NARRATION LINE

To control how a word is pronounced, use Replacements in the right rail. Click New replacement to add one, or click Open libraries to see your libraries.

Condition: this line is correct only in WellSaid Studio, the 'new Studio' in the fix, where the right rail is titled 'Project > Replacements'. The fix says Legacy Studio - Standard shows a Voices section in that spot. That is the version the tutorial demonstrates and the one DR-0064's line selects. The fix doesn't say where pronunciation is set in Legacy Studio - Standard. Use this line if the video is re-pointed to WellSaid Studio. The Personal/Team toggles are left out because the fix doesn't say what they switch. checked: ok

[Listen \(0:08\)](#) · [Open in WellSaid Studio](#) · Patrick K. · Narration
